STATE GAMING CONTROL BOARD

Gaming Revenue Analysis

For the period

12/01/91 Through 12/31/91

* * * MONTHLY REPORT * * *

INTRODUCTION

This publication is a summary of information provided by nonrestricted gaming licensees who file Monthly Gross Revenue Statistical Reports (Form NGC-31). Figures provided are subject to change due to late filings of reports, audits, and other adjustments subsequent to the date of release.

All locations included in revenue range groupings are based on the gaming revenue reported in the current period. "Year-ago" figures include the same locations regardless of the amount of revenue they produced in that period.

The minimum number of casinos in any group is five. If there are fewer than 3 casinos reporting a specific gaming unit, the information will be presented in the "others" category.

Readers may calculate the average win-per-unit by dividing the "win amount" by the number of units.

The Historical (Hist.) % Win to Drop appearing in this report may be compared directly with the % Win to Drop appearing in reports prior to January, 1988.

The Statistical (Stat.) % Win to Drop appearing in this report provides a new ratio which has been adjusted for the effects of credit play. It is not available prior to January, 1988.

The % Win to Coin-in for slot machines is a new ratio which represents the "win amount" divided by the total dollar value of the coins played. It is also not available prior to January, 1988.

Comments or questions concerning this report should be directed to the State Gaming Control Board, Tax and License Division, Economic Research Section. Additional copies may be purchased from:
