

Groundwater Pumpage Inventory: Tracy Segment (083)

The purpose, methods, and links to resources associated with this report can be found at:

<https://water.nv.gov/index.php/data/water-use-inventories/>

As a courtesy, this spreadsheet includes a copy of pumpage data from several previously published reports.

NDWR also maintains a mapping application that shows groundwater pumpage by manner of use:

[Nevada Pumpage Inventory Dashboard](#)

EXPLANATION OF COLUMN HEADINGS FOR GROUNDWATER PUMPAGE BY APPLICATION NUMBER

Note: Headings may vary slightly in historical reports

APP NO.: The file number of the permit, certificate, or vested claim of right.

SITE NAME: An ID assigned to each well, based on its geographic location.

STATUS: Indicates if the application is a permit (PER), claim of vested right (VST), or if it has been certificated. For certificated applications, the certificate number will be listed in the column.

MOU: The manner of use of the appropriated water. MOU's may include:

COM - Commercial
CON - Construction
DOM - Domestic
ENV - Environmental
IND - Industrial
IRR - Irrigation
MM - Mining & Milling
MUN - Municipal
OTH - Other
PWR - Power
QM - Quasi-Municipal
REC - Recreation
STK - Stockwater
STO - Storage
WLD - Wildlife

OWNER OF RECORD: The owner of the water right as recorded in the files of the State Engineer. A water right may have more than one owner of record.

QQ: The quarter quarter of the Section in which the point of diversion is located.

Qtr: The quarter of the Section in which the point of diversion is located.

Sec: The Section in which the point of diversion is located.

T: The Township in which the point of diversion is located.

R: The Range in which the point of diversion is located.

PER. ACRES: The number of acres that are permitted to be irrigated.

DUTY (AF): The number of acre-feet of water that the permittee may pump as defined by the permit, certificate, or claim of vested right. One acre-foot equals 325,851 gallons.

SUPP ADJ: The total combined duty of a permit group. The permits may have a supplemental relationship or be located at the same point of diversion.

DUTY USED: The amount of water used during the reporting period, in acre-feet, as determined by review of records and/or field investigation. A "--" in this field indicates that pumpage was attributed to another permit that may be supplemental or located at the same site.

UNIT: Acre-feet annually (AFA) and acre-feet seasonally (AFS). AFS limits water usage to certain months of the year.

TCD GROUP: The file number(s) of any associated groundwater appropriations.

METHOD: The method used to estimate pumpage, or duty used.

D – Duty

E – Estimated use based on field investigation observations

H – Estimated using power meter data or hours of pump operation

M – Meter reading on a totalizing meter
N – Net Irrigation Water Requirement
P – Water from the point of diversion not delivered to the place of use
R – Reported pumpage
X – Works of diversion are unequipped or non-functioning
Z – Works of diversion not yet constructed
