NEVADA TROPHY FISH PROGRAM

The Nevada Trophy Fish Program began in 1968, recognizing the talents or luck of anglers catching notable-sized fish in the state. There are 28 different fish species currently for you to enter in the program and over 600 different streams, rivers, lakes, ponds, and reservoirs throughout the state for you to catch them from. Generally, all you have to do is catch a fish at or greater than the minimum weight, measure and weigh it, take a picture, fill out the entry form, and mail it to us. It is important that if you suspect it is a state record, you must weigh it on a scale that is “weight certified” and have an NDOW employee witness it.

The table below shows the greatest angler accomplishments for the 2011 Trophy Fish Program with 15 new water records, 5 of these also being state records. Overall though, 109 fish were entered in 2011. Some anglers really got to work and entered multiple trophy fish such as Darren L. Hamrey catching a variety of 16 trophy fish from around the state and Gene St. Denis catching a variety of eight trophy fish from Lake Tahoe. However, large fish can be found throughout the many waters across the state and, this year in particular, anglers caught trophy fish from lesser known waters such as Chiatovich Creek, Cold Creek Reservoir, and the Duffurena Ponds. You will also notice throughout these pages that not all fish entered meet the minimum weight requirement. Some waters around the state, generally smaller creeks, just do not have the ability to grow large fish or, as in many cases, never have had a trophy fish entry. Therefore, entering a smaller fish may establish the water record for a particular species and earn you a certificate.

NOTE: These records are officially recognized by the Nevada Department of Wildlife as state records established from the year 1968, the first year of the Nevada Trophy Fish Program through October 2011. These records include fish taken in interstate waters including Lake Tahoe, Topaz Lake, Lake Mead, Lake Mohave and the Colorado River. It is recognized that some species of fish of larger size have been caught from Nevada waters prior to 1968.

* **NOTE:** Asterisk denotes world record according to the National Fresh Water Fishing Hall of Fame, 2011 Edition. All others are taken from the International Game Fish Association's World Record Game Fishes "All Tackle" online records as of October 2011.

****NOTE:** The recognized world record Cutthroat trout of 41 pounds was caught from Pyramid Lake in 1925.
