### Public Sector Employment Trends In Nevada (SA; 2006=100)

- Much of the decline in the public sector employment in Nevada has taken place in local government.
- Local Government jobs down 15,000 since peaking in October 2008.
- State Government employment held steady as the recession unfolded but has trended down since early-2011. 2,000 jobs lost since then.
- The 2010 spike in federal employment was driven by temporary Census hiring.
- Through the first half of this year, private sector jobs are up 14,000 relative to 2011 in Nevada.
