Job Growth by Establishment Size in Nevada

September 2, 2014

Christopher Robison, Supervisory Economist

Big Job Gains in Establishments with 1,000+ Workers; Small/Mid-Size Establishments also Solid 2013:1Q-2014:1Q Job Growth by Establishment Size

- For the 12-month period ending in the first quarter 2014, private sector establishments of at least 1,000 employees experienced the strongest job growth (+7,500). In this category, the super sector experiencing the strongest growth was leisure and hospitality, especially in hotel casinos.
- The establishment size category with the next strongest growth included those with 20-49 workers. All told, the growth has totaled 6,800 over the past year. Although this category was also dominated by the leisure and hospitality super sector, restaurants, not casino resorts, were primarily responsible for the growth.
- The third largest growth class was in the 50-99 workers category (+6,800). Trade/transportation/utilities accounted for more than any other super sector contributing 25 percent of the job growth in those establishments.
- All told, establishments with less than 100 workers added 20,000 jobs over the year.
