ABSTRACT

This inventory presents the current status and usage of all non-revocable¹ and revocable² ground-water rights located within the Las Vegas Valley, Clark County, Nevada for the calendar year 1988, also included for summary purposes are various tables and graphs showing the consumptive water use from the Colorado River and Effluent.

The numbers which follow are valid at the time of this report and may vary from previously published figures since water rights within the Las Vegas Valley are being approved, cancelled, certified or withdrawn on a daily basis.

Currently the total ground-water rights permitted within the Las Vegas Valley equal 88,448 acre-feet. Of this, 70,873 acre-feet are non-revocable and 17,575 acre-feet are revocable.

For the calendar year of 1988 67,854 acre-feet of ground-water were pumped from the Las Vegas Valley. Of this amount, 56,948 acre-feet represent non-revocable rights; this is 80 percent of the available non-revocable rights and 84 percent of the total pumped for 1988. Also, during 1988, there were 4,685 acre-feet of revocable water rights pumped; this is 27 percent of the available revocable water rights and 7 percent of the total pumped for 1988. The

¹ Non-revocable rights are those rights which have a priority date of March 24, 1955 or earlier.

² Revocable rights are those rights which have a priority date after March 24, 1955 and are subject to revocation if and when water can be furnished by a municipality engaged in furnishing water.

remaining 9 percent of ground-water pumped for 1988 is the estimated usage from domestic wells.

Of the 88,448 acre-feet of ground-water rights permitted within the Las Vegas Valley, 66,627 acre-feet are metered; even though this is only 75 percent of the total permitted rights, 84 percent of the total permitted water rights pumped during 1988 are metered.

During the calendar year of 1988 there were four revocable permits revoked within the Las Vegas Valley. These revocable permits were for Commercial and Quasi-Municipal use with a maximum consumptive use of 636 acre-feet per year.

1988 was the second year for the artificial recharge project in which 1153 acre-feet of potable Colorado River water were injected into the Las Vegas Valley ground-water basin.

GENERAL STATEMENT

The Las Vegas Valley ground-water pumpage data is collected by several methods and a brief explanation follows. A running total is kept of all wells drilled which have been designated for domestic use and a usage value of one acre-foot per year is given to each of these wells as listed in table No. 1.

The Southern Nevada Branch office of the Division of Water Resources reads approximately 230 well meters monthly, which includes all of the hotels, golf courses and large private industries that obtain some, if not all, of their water from their own wells. This data is listed in table No. 1 under metered permit wells.

The Southern Nevada Branch Office of the Division of Water Resources also conducts approximately 275 individual field investigations each year in the Las Vegas area; this data, together with data from previous years, is listed in table No. 1 under unmetered permit wells. The remaining data is supplied monthly by water purveyors and is listed in table No. 1.

The summation of this data as indicated in table No. 1 is the annual amount of ground-water pumped from the Las Vegas Valley.
