ABSTRACT

This inventory presents the current status and usage of all non-revocable¹, revocable² and environmental control³ ground-water rights located within the Las Vegas Valley, Clark County, Nevada for the calendar year 1993, also included for summary purposes are various tables and graphs showing the consumptive water use from the Colorado River and effluent re-use.

The numbers which follow are valid at the time of this report and may vary from previously published figures since water rights within the Las Vegas Valley are being approved, cancelled, certified or withdrawn on a daily basis.

Currently the total ground-water rights permitted within the Las Vegas Valley equals 88,485 acre-feet. Of this, 71,025 acre-feet are non-revocable, 15,230 acre-feet are revocable and 2,230 acre-feet are rights for environmental control.

For the calendar year of 1993, 67,356⁴ acre-feet of ground-water were pumped from the Las Vegas Valley, of this amount, 54,182 acre-feet represent non-revocable rights; this is 76 percent of the available non-revocable rights and 80 percent of the total pumped for 1993, 5,282 acre-feet

¹ Non-revocable rights are those rights which have a priority date of March 24, 1955 or earlier.

² Revocable rights are those rights which have a priority date after March 24, 1955 and are subject to revocation if and when water can be furnished by a municipality engaged in furnishing water.

³ Permits issued for environmental control are not subject to revocation, but are site specific and limited to the length of the environmental control project.

⁴ Does not include ground water debited from artificial recharge storage account.

represents revocable permits, this is 34 percent of the available revocable permits and 7.8 percent of the total pumped for 1993. Also, during 1993, there were 1,080 acre-feet of environmental control rights pumped; this is 48 percent of the available environmental control permits and 1.6 percent of the total pumped for 1993. The remaining 10.6 percent of ground-water pumped for 1993 is the estimated usage from domestic wells.

Of the 88,485 acre-feet of ground-water rights permitted within the Las Vegas Valley, 67,488 acre-feet are metered; even though this is only 76 percent of the total permitted rights, 82 percent of the total permitted water rights pumped during 1993 are metered.

1993 was the seventh year for the artificial recharge project in which 24,535 acre-feet of potable Colorado River water were injected into the Las Vegas Valley ground-water basin.

GENERAL STATEMENT

The Las Vegas Valley ground-water pumpage data is collected by several methods, a brief explanation follows. A running total is kept of all wells drilled which have been designated for domestic use and a usage value of one acre-foot per year is given to each of these wells as listed in table No. 1.

The Southern Nevada Branch office of the Division of Water Resources reads approximately 684 well meters monthly, which includes all of the hotels, golf courses and large private industries that obtain some, if not all, of their water from their own wells. This data is listed in table No. 1 under metered permit wells.

The Southern Nevada Branch Office of the Division of Water Resources also conducts approximately 300 individual field investigations each year in the Las Vegas area; this data, together with data from previous years, is listed in table No. 1 under unmetered permit wells. The remaining data is supplied monthly by water purveyors and is listed in table No. 1.

The summation of this data as indicated in table No. 1 is the annual amount of ground-water pumped from the Las Vegas Valley.

1. From records of the Las Vegas Valley Water District using a conversion factor of 3.07 acre-feet per million gallons.
2. From yearly pumpage inventories on record with the State Engineer's Office.
3. Does not include credit from artificial recharge.
 - a. Duty assigned to each domestic well ranges from .50 to .99 acre-feet per year.
 - b. A duty of 1.61 acre-feet per year given to each domestic well.
 - c. A duty of 1.0 acre-feet per year given to each domestic well.
 - d. Revised from previously published figures due to correction of meter reading.
 - e. Does not include water pumped from artificial recharge storage.
