Abstract

This inventory represents the current status and usage of all non-revocable¹, revocable², environmental control³ and shallow aquifer⁴ groundwater rights located within the Las Vegas Valley, Clark County, Nevada for the 1996 calendar year. Also included for summary purposes are various tables and graphs showing the imported use from the Colorado River and effluent re-use.

The numbers that follow are valid at the time of this report and may vary from previously published figures since water rights within the Las Vegas Valley are being approved, adjudicated, certified, cancelled or withdrawn on a daily basis.

Currently the total groundwater rights permitted within the Las Vegas Valley equals 89,851 acre-feet. Of this, 71,022 acre-feet are non-revocable; 14,802 acre-feet are revocable; 3,354 acre-feet are environmental control and 673 acre-feet are rights for the shallow aquifer.

For the 1996 calendar year, 75,908 acre-feet of groundwater was pumped from the Las Vegas Valley. Of this amount, 60,168 acre-feet represents non-revocable rights: This is 85 percent of the available non-revocable rights and 79.3 percent of the total pumped for 1996. 5,358 acre-feet represent revocable rights. This is 36 percent of the available revocable rights and 7.1 percent of the total pumped for 1996. 1,493 acre-feet represent environmental control rights. This is 45 percent of the available environmental control rights and 1.9 percent of the total pumped for 1996. 140.2 acre-feet represent shallow aquifer rights: This is 20 percent of the available shallow aquifer rights and .2 percent of the total pumped for 1996.

Types of Water Rights pumped within the Las Vegas Valley

¹ Non-revocable rights are those rights which have a priority date of March 24, 1955 or earlier.

² Revocable rights are those rights which have a priority date after March 24, 1955 and are subject to revocation when water can be furnished by a municipality engaged in furnishing water.

³ Permits issued for environmental control are not subject to revocation, but are site specific and limited to the length of the project.

⁴ Shallow aquifer rights are those rights issued to beneficially use water pumped to alleviate potential hazards to persons and property resulting from the rise of groundwater due to secondary recharge.

Also during 1996, 1,625 acre-feet of water was pumped from recharge storage, which represents 2.1 percent of the total groundwater pumped. The remaining 9.4 percent (7,124 acre-feet) of groundwater pumped for 1996 is accounted for as estimated usage from domestic wells.

Of the 89,851 acre-feet of groundwater rights permitted within the Las Vegas Valley, 63,086 acre-feet are metered; even though this is only 70 percent of the total permitted rights, 83 percent of the total permitted water rights pumped during 1996 are metered.

1996 was the tenth year for the artificial recharge program in which 13,464 acre-feet of potable Colorado River water was injected into the Las Vegas Valley groundwater basin.

General Statement

The Las Vegas Valley groundwater pumpage data is collected by several methods, a brief explanation follows.

The Southern Nevada Branch Office of the Division of Water Resources read approximately 970 well meters during 1996 which included all of the hotels, golf courses and large private industries that obtain some, if not all of their water from their own wells. This data is listed in Table No. 1 under metered permit wells which includes historical data for individual meters that were not read during 1996.

The Southern Nevada Branch Office of the Division of Water Resources also conducts approximately 135 individual field investigations each year in the Las Vegas area. This data, together with data from previous years, is listed in Table No. 1 under unmetered permit wells. The remaining data is supplied monthly by the individual water purveyors and is listed in Table No. 1.

A running total is kept of all wells drilled which have been designated for domestic use and a usage value of one acre-foot per year is given to each of these wells as listed in Table No. 1.

Debits from the Artificial Storage account are made when the individual public utilities groundwater pumpage exceeds their permitted groundwater rights.

Artificial recharge is Colorado River water that was injected into the Las Vegas Valley groundwater aquifer.

The summation of this data, as indicated in Table No. 1, is the annual amount of ground-water pumped from the Las Vegas Valley.

Table No. 1 - Groundwater pumpage and artificial recharge within the Las Vegas Valley for the 1996 calendar year, in acre-feet.

Water purveyors¹

Las Vegas Valley Water District	39,918
City of North Las Vegas	5,669
Nellis Air Force Base ²	1,019
Metered Permit Wells	14,854
Unmetered Permit Wells ³	5,699
Domestic wells ⁴	7,124
Sub Total	74,283

Debits from Artificial Recharge Storage Account

Las Vegas Valley Water District	1,625
City of North Las Vegas	0

Total groundwater pumped	75,908
--------------------------	--------

Artificial Recharge

Las Vegas Valley Water District	12,005
City of North Las Vegas	1,459

Total net groundwater pumped ⁵	62,444
---	--------

¹ Does not include water pumped from artificial recharge storage.

² Includes housing units, golf course and area II.

³ Estimated usage based on field investigations.

⁴ Domestic wells drilled during 1996 equals 111. Total domestic wells drilled as of December 31, 1996 equals 7,124. A duty of 1.0 acre-foot per year per well.

⁵ Includes credit for artificial recharge.

Table No. 2 - Total water consumption and groundwater recharge within the Las Vegas Valley for the 1996 calendar year, in acre-feet.
--

Total groundwater pumped ¹	75,908
Colorado River	356,288
Effluent re-use	10,019
Gross consumption ²	442,215
Recharged Colorado River water	13,464
Net consumption ³	428,751

¹ Includes water pumped from artificial recharge storage.

² Includes effluent re-use, but no credit for artificial recharge. (TGW+CRW+ERU=GC)

³ Includes credit for artificial recharge. (TGW+CRW+ERU-RC=NC)

¹From revised records of the Nevada Colorado River Commission.

²First water delivered June 16, 1971.

³Colorado River water diverted through the Basic Management pipe line.

⁴Includes losses from the Southern Nevada Water System.

⁵Does not include 14,415 acre-feet diverted for testing of the Southern Nevada Water System.
