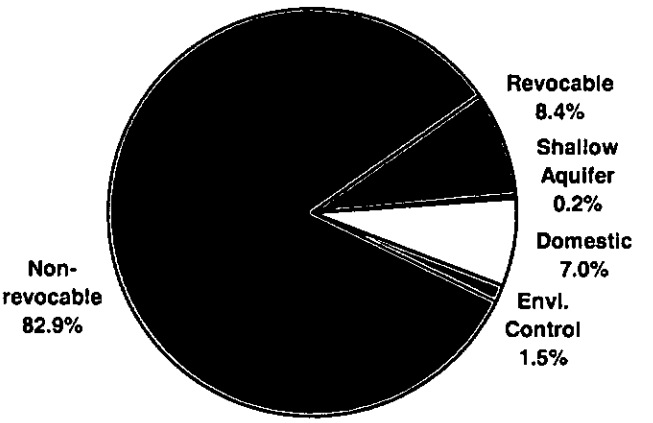
Abstract

This inventory represents the current status and usage of all non-revocable[1], revocable[2], environmental control[3] and shallow aquifer[4] groundwater rights located within the Las Vegas Valley, Clark County, Nevada for the 1999 calendar year. Also included for summary purposes are various tables and graphs showing the imported use from the Colorado River and effluent re-use.

The numbers that follow are valid at the time of this report and may vary from previously published figures since water rights within the Las Vegas Valley are being approved, certified, canceled or withdrawn on a daily basis.

Currently the total groundwater rights permitted within the Las Vegas Valley equals 90,446 acre-feet. Of this, 70,506 acre-feet are non-revocable; 14,736 acre-feet are revocable; 4,935 acre-feet are environmental control and 269 acre-feet are rights for the shallow aquifer.

For the 1999 calendar year, 72,968 acre-feet of groundwater was pumped from the Las Vegas Valley. Of this amount, 60,511 acre-feet represents non-revocable rights: This is 85.8 percent of the available non-revocable rights and 82.9 percent of the total pumped for 1999. 6,153 acre-feet represent revocable rights. This is 41.8 percent of the available revocable rights and 8.4 percent of the total pumped for 1999. 1,074 acre-feet represent environmental control rights. This is 21.7 percent of the available environmental control rights and 1.5 percent of the total pumped for 1999. 142 acre-feet represent shallow aquifer rights: This is 52.8 percent of the available shallow aquifer rights and .2 percent of the total pumped for 1999.



Types of Water Rights pumped within the Las Vegas Valley

[1] Non-revocable rights are those rights which have a priority date prior to March 24, 1955.
[2] Revocable rights are those rights which have a priority date on or after March 24, 1955 and are subject to revocation when water can be furnished by a municipality engaged in furnishing water.
[3] Permits issued for environmental control are not subject to revocation, but are site specific and limited to the length of the project.
[4] Shallow aquifer rights are those rights issued to beneficially use water pumped to alleviate potential hazards to persons and property resulting from the rise of groundwater due to secondary recharge.

The remaining 7.0 percent (5,088 acre-feet) of groundwater pumped for 1999 is accounted for as estimated usage from domestic wells. During 1999 no water was pumped from recharge storage.

Of the 90,446 acre-feet of groundwater rights permitted within the Las Vegas Valley, 76,210 acre-feet are metered; this is 84.3 percent of the total permitted rights and 88.4 percent of the total permitted water rights pumped during 1999 were metered.

1999 was the thirteenth year for the artificial recharge program in which 32,361 acre-feet of potable Colorado River water was injected into the Las Vegas Valley groundwater basin.

General Statement

The Las Vegas Valley groundwater pumpage data is collected by several methods, a brief explanation follows.

The Southern Nevada Branch Office of the Division of Water Resources read 1,252 well meters during 1999 which included all of the hotels, golf courses and large private industries that obtain some, if not all of their water from their own wells. This data is listed in Table No. 1 under metered permit wells which includes historical data for individual meters that were not read during 1999.

The Southern Nevada Branch Office of the Division of Water Resources also conducted 246 individual field investigations in the Las Vegas area: This data, together with data from previous years, is listed in Table No. 1 under unmetered permit wells. The remaining data is supplied monthly by the individual water purveyors and is listed in Table No. 1.

The inventory of domestic wells has been completed and is up to date through December 31, 1999. For the 1999 report the total number of domestic wells is a summation of wells located during the domestic well inventory and new domestic wells reduced by the number of domestic wells plugged and abandoned. A usage value of one acre-foot per year was then given to each of the remaining wells as listed in Table No. 1.

Historically the State Engineer has issued certificates of appropriation with the amount of the appropriation limited by diversion rate and duty. However, in some instances the State Engineer issued certificates of appropriation with a diversion rate but no limiting duty. For statistical purposes in the preparation of this report the diversion rate was expanded to establish a duty of water. The actual duty in these instances is the limit and extent of the water actually placed to beneficial use, not to exceed the diversion rate expanded.

Debits from the Artificial Storage account are made when the individual public utilities groundwater pumpage exceeds their permitted groundwater rights.

Artificial recharge is Colorado River water that was injected into the Las Vegas Valley groundwater aquifer.

The summation of this data, as indicated in Table No. 1, is the annual amount of ground-water pumped from the Las Vegas Valley.

[1] Does not include water pumped from artificial recharge storage.
[2] Includes housing units, golf course and area II.
[3] Estimated usage based on field investigations.
[4] Domestic wells drilled during 1999 equals 74, plugged and abandoned wells equals 63. The number of domestic wells was adjusted per the recent GIS well inventory. The total domestic wells active as of December 31, 1999 equals 5,088, with an assigned duty of 1.0 acre-foot per year per well.
[5] Includes credit for artificial recharge.
