Abstract

This inventory represents the current status and usage of all non-revocable¹, revocable², environmental control³ and shallow aquifer⁴ groundwater rights located within the Las Vegas Valley, Clark County, Nevada for the 2013 calendar year. Also included for summary purposes are various tables and graphs showing the imported use from the Colorado River and effluent re-use.

The numbers that follow are valid at the time of this report and may vary from previously published figures since water rights within the Las Vegas Valley are being approved, certified, canceled or withdrawn on a daily basis.

Currently the total groundwater rights permitted within the Las Vegas Valley equals 87,140 acre-feet. Of this, 68,256 acre-feet are non-revocable; 7,935 acre-feet are revocable; 10,579 acre-feet are environmental control and 370 acre-feet are rights for the shallow aquifer.

Types of Water Rights pumped within the Las Vegas Valley

For the 2013 calendar year, 78,013 acre-feet of groundwater were pumped from the Las Vegas Valley. Of this amount, 62,376 acre-feet represent non-revocable rights. This is 91.4 percent of the available non-revocable rights and 80.0 percent of the total pumped for 2013. 4,581 acre-feet represent revocable rights. This is 57.7 percent of the available revocable rights and 5.9 percent of the total pumped for 2013. 2,398 acre-feet represent environmental control rights. This is 22.7 percent of the available environmental control rights and 3.1 percent of the total pumped for 2013. 186 acre-feet represent shallow aquifer rights. This is 50.3 percent of the available shallow aquifer rights and 0.2 percent of the total pumped for 2013. 3,915 acre-feet represents recharge recovery, which is 5.0 percent of the pumped for 2013. The remaining 5.8 percent (4,557 acre-feet) of groundwater pumped for 2013 is accounted for as estimated usage from domestic wells. Of the 87,140 acre-

¹ Non-revocable rights are those rights, which have a priority date prior to March 24, 1955.

² Revocable rights are those rights, which have a priority date on or after March 24, 1955 and are subject to revocation when a municipality engaged in furnishing water can furnish water.

³ Permits issued for environmental control are not subject to revocation, but are site specific and limited to the length of the project.

⁴ Shallow aquifer rights are those rights issued to beneficially use water pumped to alleviate potential hazards to persons and property resulting from the rise of groundwater due to secondary recharge.

feet of groundwater rights permitted within the Las Vegas Valley, 74,257 acre-feet are metered; this is 85.2 percent of the total permitted rights.

2013 was the twenty-seventh year for the artificial recharge program in which 0.0 acre-feet of potable Colorado River water was injected into the Las Vegas Valley groundwater basin.

General Statement

The Las Vegas Valley groundwater pumpage data is collected by several methods, a brief explanation follows.

The Southern Nevada Branch Office of the Division of Water Resources maintains 1,386-meter pages and conducted approximately 2,780 site visits during 2013 to collect meter data. The collected meter data includes all of the hotels, golf courses and large private industries that obtain some, if not all, of their water from their own wells. This data is listed in Table No. 1 under metered permit wells which include historical data for individual meters that were not read during 2013.

The Southern Nevada Branch Office of the Division of Water Resources also conducted 116 individual field investigations in the Las Vegas area. This data, together with data from previous years, is listed in Table No. 1 under unmetered permit wells. The remaining data is supplied monthly by the individual water purveyors and is listed in Table No. 1.

The inventory of domestic wells has been completed and is up to date. For this report the total number of domestic wells is a summation of wells located during the domestic well inventory and new domestic wells reduced by the number of domestic wells plugged and abandoned. A usage value of one acre-foot per year was then given to each of the remaining wells as listed in Table No. 1.

Historically the State Engineer has issued certificates of appropriation with the amount of the appropriation limited by diversion rate and duty. However, in some instances the State Engineer issued certificates of appropriation with a diversion rate without limiting the duty. The 2003 session of the Nevada legislature passed SB 336 requiring the State Engineer to quantify certain water rights in acre-feet, give certain notice concerning those water rights and file a notice concerning those water rights with the office of the county recorder of the county in which the water is appropriated. In preparation of this report, rights for which the quantification has been completed are treated like other rights. If the quantification was not completed the duty was set to zero for statistical purposes and the duty is reported as zero in the summary of groundwater usage. This change was enacted to insure that the reported statistics corresponded to the reported groundwater usage. The actual duty in these instances is the limit and extent of the water actually placed to beneficial use, not to exceed the diversion rate expanded.

Artificial recharge is Colorado River water that is injected into the Las Vegas Valley groundwater aquifer. Debits from the artificial recharge storage account are made when the individual public utilities groundwater pumpage exceeds their permitted groundwater rights.

The summation of this data, as indicated in Table No. 1, is the annual amount of ground water pumped from the Las Vegas Valley.
