ABSTRACT

This inventory represents the status and pumpage of all permitted, certificated and claims of vested right groundwater rights located within Las Vegas Valley, Hydrographic Basin 13-212, for calendar year 2016 (January 1, 2016 through December 31, 2016). Also included is data associated with depth to groundwater. The data presented are valid for the period of this report, and may vary from previously published data as water rights within the basin are subject to administrative action, such as certification, cancellation, forfeiture, or withdrawal on a daily basis.

For calendar year 2016 the permitted, certificated and claims of vested right groundwater rights totaled **89,886 acre-feet**. Estimated pumpage for the water year was **71,735 acre-feet**. Municipal and quasi-municipal are the largest manner of uses within the basin. For calendar year 2016, appropriations for municipal and quasi-municipal totaled 61,961 acre-feet, with pumpage of 53,467 acre-feet (including 444 acre-feet of recharge recovery). The second largest manner of use was recreation with appropriations totaling 5,547 acre-feet and pumpage of 5,275 acre-feet. The third largest manner of use was pumping by domestic use and exempt domestic wells, at 4,986 acre-feet. Exempt domestic wells are defined by Nevada Revised Statutes 534.013 and do not require a permit issued by the State Engineer.

HYDROGRAPHIC BASIN SUMMARY

HYDROGRAPHIC BASIN NUMBER	212, REGION 13	
HYDROGRAPHIC BASIN NAME	LAS VEGAS VALLEY	
COUNTIES	CLARK	
MAJOR COMMUNITIES	LAS VEGAS, NORTH LAS VEGAS, HENDERSON	
DESIGNATED	YES	
DENIALS BASED UPON WATER AVAILABILITY	ALL USES

RECREATION.....5,547 WILDLIFE.....123		

NOTE: Committed groundwater resource data are accurate for April 2017. Manner of use category totals vary over time, as water rights (rights) are not necessarily static. Rights may be subject to change applications, certification, withdrawals, forfeiture and cancellations; each of these circumstances could impact the duty, diversion rate and acreage associated with a given right.

¹Includes pumpage by exempt domestic wells, as defined by NRS 534.013. The domestic use estimate is based upon a count of the total domestic wells in the basin multiplied by 1 acre-foot per annum. The number of domestic wells in the basin, estimated by a query of the Nevada Division of Water Resources Well Log Database, is 4,472.

PURPOSE AND SCOPE

The purpose of this report is to inventory all of the groundwater resources allocated and described by the Office of the State Engineer, Nevada Division of Water Resources (NDWR), and to estimate the amount of groundwater pumped within the Las Vegas Valley (Hydrographic Basin 13-212), for the calendar year 2016. This report estimates the amount of groundwater pumped under the permits and certificates issued by the State Engineer, claims of vested right, and the amount pumped by exempt domestic wells within the basin.

DESCRIPTION OF THE STUDY AREA

The Las Vegas Valley Hydrographic Basin is located within Clark County in southern Nevada, occupying approximately 1,564 square miles (Figure 1). The basin lies approximately 35 miles west of the Hoover Dam, and is within the Colorado River Hydrographic Region. Las Vegas, the most populated city in Nevada, is the principal community.

The Las Vegas Valley is bounded on the west by the Spring Mountains; on the north by the southern parts of the Sheep and Las Vegas Ranges; on the east by Frenchman Mountain and other low-lying ranges; and on the south by the River Mountains and McCullough Range. Most of the groundwater supply is generated from precipitation that falls on the Spring Mountains and Sheep Range. The valley is topographically closed except for Las Vegas Wash to the southeast which drains into Lake Mead. The highest point is Charleston Peak with an altitude of 11,918 feet, and the lowest point is where the Las Vegas Wash flows out of the basin at around 1,450 feet. The adjacent Nevada hydrographic basins are as follows: Pahrump Valley (10-162) to the west; Three Lakes Valley – Southern Part (13-211) to the north and northwest; Coyote Spring Valley (13-210) to the north; Hidden Valley (North, 13-217) and Garnet Valley (Dry Lake Valley, 13-216) to the northeast; Black Mountains Area (13-215) to the east; Eldorado Valley (10-167) to the southeast; Hidden Valley (South, 10-166) and Jean Lake Valley (10-165) to the south; and Ivanpah Valley – Northern Part (10-164A) and Mesquite Valley (Sandy Valley, 10-163) to the southwest. The exterior boundary of the Las Vegas Valley Hydrographic Basin is as described by Designation Orders 175, 182, 189, 249, 275, 833 issued by the Nevada State Engineer on January 10, 1941, February 29, 1944, November 22, 1946, April 18, 1961, May 25, 1964, and December 27, 1983, respectively.

GROUNDWATER LEVELS

Depths to groundwater in Las Vegas Valley have been measured by the Nevada Division of Water Resources consistently since the early 1950's. There are 16 active sites (Figure 2) and 92 inactive sites in the monitoring well network. Active site names and links to their data are:

Groundwater level data are currently being collected by the U.S. Geological Survey and may be accessed through their website (<http://nevada.usgs.gov/>). Groundwater level data are also collected by the Southern Nevada Water Authority (SNWA), City of North Las Vegas (CNLV), and City of Las Vegas (CLV) and may be accessed through their respective websites.

IMPORTED WATER

Las Vegas Valley Water District (LVVWD) is the primary water purveyor in Las Vegas Valley. LVVWD uses both surface and groundwater resources diverted from within the basin to meet the municipal supply demand. LVVWD also imports surface water from a neighboring hydrographic basin for use within its service area. Colorado River surface water has been imported from the Black Mountains Area Basin to the Las Vegas Valley Basin since 1942, when a pipeline was constructed from Lake Mead to the Basic Magnesium Project to support the war effort. Prior to 1955, the City of Henderson (CoH) and Basic Management, Inc. (BMI) were the only areas in the valley served by imported Colorado River water. In 1955, LVVWD began purchasing water from BMI for public supply purposes. In 1971, the Southern Nevada Water Project became operational and large-scale importation of Colorado River water to the valley became possible. During calendar year 2016, a total of **292,584 acre-feet** of surface water was imported for use within the LVVWD service area.

CoH is also a water purveyor in Las Vegas Valley that imports Colorado River surface water for use within its service area. During calendar year 2016, a total of **76,819 acre-feet** of surface water was imported for use within the CoH service area.

CNLV is a water purveyor in Las Vegas Valley that uses both surface and groundwater resources diverted from within the basin to meet the municipal supply demand. CNLV also imports Colorado River surface water for use within its service area. During calendar year 2016, a total of **50,602 acre-feet** of surface water was imported for use within the CNLV service area.

In summary, a total of **433,858 acre-feet** (including BMI, Nellis Air Force Base, and system losses) of surface water were imported for use within the Las Vegas Valley during calendar year 2016.

RECHARGE, STORAGE AND RECOVERY PROGRAM

LVVWD operates an aquifer recharge, storage, and recovery program in Las Vegas Valley. This project is associated with Nevada State Engineer's Recharge Permits R-001, R-003, and R-012, and has been in operation since 1987. Treated Colorado River water is injected into transmissive units of the principal aquifer via 78 injection wells primarily in the central and northwest parts of the Las Vegas Valley. No water was recharged by LVVWD during calendar year 2016. State Engineer's Order No. 1176 (In-Lieu Recharge) was issued on December 10, 2004 and allows credit for pumping less than the permitted groundwater rights that a municipal water purveyor possess. Said order allows 85 percent of non-pumped groundwater allocation to be recovered in the future, while 15 percent of the water remains in the aquifer. During calendar year 2016,

LVVWD recovered **0 acre-feet** of existing in-lieu recharge. Another **444 acre-feet** of recharge was recovered under the program during calendar year 2016 by the Las Vegas Paiute Tribe, per agreement with LVVWD and SNWA.

CNLV operates an aquifer recharge, storage, and recovery program in Las Vegas Valley. This project is associated with Nevada State Engineer's Recharge Permits R-007 and R-008, and has been in operation since 1990. Treated Colorado River water is injected into the principal aquifer via eight injection wells. No water was recharged by CNLV during calendar year 2016, and CNLV did not recover any existing in-lieu recharge. However, CNLV did earn an in-lieu recharge credit of **3,711 acre-feet**.

EFFLUENT

Several agencies operate wastewater treatment facilities within the Las Vegas Valley area. The Clark County Water Reclamation District (CCWRD) operates two, CLV operates three, CoH operates two, and CNLV operates one. All of these facilities treat wastewater received from sewer connections, including residential, hotel, commercial, and industrial users. The treated effluent is then either discharged into Las Vegas Wash or is pumped to other uses. All of the wastewater in the Las Vegas Valley is reclaimed: the majority via Colorado River System return flow credits into Lake Mead; some is directly reused as treated effluent for irrigation on golf courses and parks or other industrial uses. Use of the effluent for irrigation or other uses is authorized by the Nevada State Engineer under secondary permits. For calendar year 2016, a total of **24,174 acre-feet** of effluent were delivered for reuse in the Las Vegas Valley.

METHODS TO ESTIMATE PUMPAGE

This report estimates the amount of groundwater pumped under the permits and certificates issued by the Nevada State Engineer as well as claims of vested right and exempt domestic wells in the Las Vegas Valley Hydrographic Basin. The following methods were used to arrive at the estimated use:

- Where totalizing meters were in place, meter readings were taken and compared with previous data (if available).
- Where meters were not in place and the use was irrigation, pumpage was estimated by multiplying the number of hours the well was operated during the past year (determined from an hour meter reading or asking the water user) by the certificated diversion rate.
- Where there were no flow meters or other reliable options for estimating pumpage and the use was irrigation, pumpage was estimated by dividing the Net Irrigation Water Requirement (NIWR) for the crop grown by the efficiency of the irrigation method used, then multiplying by the number of acres irrigated. Irrigation efficiencies associated with three types of irrigation methods are: pivot at 85%; wheel line or other hand moved sprinklers at 75%; and flood at 60%. The pumpage amount estimated by this method was limited by the duty of the permit. For places where the groundwater rights were supplemental to surface water, groundwater use was estimated using the NIWR method above, but adjusted based on available surface

water for the year. Evapotranspiration and NIWR data by basin can be found on the NDWR website at: <http://water.nv.gov/Evapotranspiration.aspx>.

- Where meters were not present, previous data were not available, and the manner of use was not irrigation, pumpage was estimated by applying the annual duty associated with the certificate (if the water right was perfected), permit or claim, if the use was as described in the certificate, permit or claim. If the use was not as described in the certificate, permit or claim, a value was estimated based upon the circumstances of use for the subject year.
- Exempt domestic wells may be drilled and utilized where water service from a purveyor is not available. These types of wells do not require a permit from the State Engineer if they do not pump more than two acre-feet per year as provided by Nevada Revised Statutes (NRS) [534.180](#). [NRS 534.013](#) defines this category of domestic use as follows: “*Domestic use or domestic purposes extends to culinary and household purposes directly related to a single family dwelling, including, without limitation, the watering of a family garden and lawn and the watering of livestock and any other domestic animals or household pets.*” The number of exempt domestic wells in the basin is determined by a query of the NDWR Well Log Database. The amount of water pumped by exempt domestic wells is estimated to be one acre-foot per well in Las Vegas Valley.

PUMPAGE BY MANNER OF USE

Note that all data herein are estimates and subject to revision. The total estimated groundwater pumpage for calendar year 2016 was **71,735 acre-feet**. The annual duties of the certificates, permits and claims of vested right within the Las Vegas Valley Hydrographic Basin totaled **89,886 acre-feet**. The appropriated and actual pumped totals for calendar year 2016, categorized by manner of use, are:

A. Municipal & Quasi-Municipal (MUN & QM)

Appropriations for municipal and quasi-municipal purposes totaled 61,961 acre-feet, with estimated pumpage of 53,467 acre-feet (including 444 acre-feet of recharge recovery).

B. Environmental (ENV)

Appropriations for environmental purposes totaled 11,663 acre-feet, with estimated pumpage of 2,620 acre-feet.

C. Recreation (REC)

Appropriations for recreation purposes totaled 5,547 acre-feet, with estimated pumpage of 5,275 acre-feet.

D. Mining & Milling (MM)

Appropriations for mining & milling purposes totaled 4,058 acre-feet, with estimated pumpage of 1,733 acre-feet.

E. Irrigation (IRR)

Appropriations for irrigation purposes totaled 3,508 acre-feet, with estimated pumpage of 1,909 acre-feet.

F. Commercial (COM)

Appropriations for commercial purposes totaled 1,562 acre-feet, with estimated pumpage of 1,228 acre-feet.

G. Industrial (IND)

Appropriations for industrial purposes totaled 707 acre-feet, with estimated pumpage of 373 acre-feet.

H. Domestic (DOM)

Appropriations for domestic purposes totaled 412 acre-feet, with estimated pumpage of 514 acre-feet. Also, records of the State Engineer indicate an estimated 4,472 exempt domestic wells existed in the basin during calendar year 2016. The amount of water pumped for that domestic use as described under NRS 534.013 is estimated at 4,472 acre-feet. Therefore, the total amount of water pumped for all domestic uses during calendar year 2016 was 4,986 acre-feet.

I. Other (OTH)

Appropriations for other purposes totaled 345 acre-feet, with estimated pumpage of 46 acre-feet.

J. Wildlife (WLD)

Appropriations for wildlife purposes totaled 123 acre-feet, with estimated pumpage of 98 acre-feet.

¹From records of the Las Vegas Valley Water District.

²From records of the Division of Water Resources.

³Does not include credit from Artificial Recharge.

⁴Includes credit from Artificial Recharge.

^aDuty assigned to each domestic well ranges from .5 to .99 acre-feet per year.

^bDuty of 1.61 acre-feet per year assigned to each domestic well.

^cDuty of 1.0 acre-foot per year assigned to each active domestic well.

^dRevised from previously published figures.

^eIncludes recovery of artificial recharge.

^fNumber of domestic wells adjusted per GIS well inventory.

¹From revised records of the Nevada Colorado River Commission.

²First water delivered June 16, 1971.

³Colorado River water diverted through Basic Management pipe line not used by Park Service or Henderson.

⁴Includes losses from the Southern Nevada Water System, 7,887 acre-feet.

⁵Does not include 14,415 acre-feet diverted for testing of the Southern Nevada Water System.

⁶Colorado River water diverted through the Basic Management pipeline and used by the City of Henderson, does not include deliveries to the Lake of Las Vegas development in Black Mountain Basin, 1,934 acre-feet in 2016.

⁷Revised from previously published figures.

⁸Colorado River water diverted through Basic Management pipeline and used by Las Vegas Valley Water District.

**APPENDIX A. LAS VEGAS VALLEY EFFLUENT WATER REUSE FOR CALENDAR
YEAR 2016.**

Explanation of Column Headings for Effluent Water Reuse Inventory

NUMBER	The file number of the Application.
STA	Status of the application: Permit (PER) or Certificate (CET).
OWNER OF RECORD	The owner of the water right as recorded in the files of the State Engineer. A water right may have more than one owner of record.
LEGAL	The Township - Range - Section in which the point of diversion is located.
US	Manner of use of appropriated water. The types of manner of use may include: ID – Industrial MN – Municipal RC – Recreation IR – Irrigation PO – Power ST – Storage
DUTY	The amount of water allowed under the permit(s).
PUMP16	The amount of water used during the calendar year, in acre-feet, as determined by meter readings, review of records and/or field investigation.
METHOD	METER = meter readings; FIELD = field investigation and/or review of records.
DATE	Date of field investigation or year meter readings were taken.
REMARKS	Abbreviations used: CFS = cubic feet per second.
