LIST OF OFFICERS.

BOARD OF COMMISSIONERS.

HON. R. SADLER	Carson City, Nevada
HON. S. P. DAVIS	Carson City, Nevada
HON. D. M. RYAN	Carson City, Nevada
HON. F. L. WILDES, Clerk.....	Carson City, Nevada

HOSPITAL OFFICERS.

H. BERGSTEIN, M. D., Superintendent.....	Reno, Nevada
C. L. LAGRAVE, Supervisor and Clerk.....	Reno, Nevada
MRS. F. M. DUFFY, Matron.....	Reno, Nevada
THOMAS SULLIVAN, Engineer	Reno, Nevada

REPORT.

To the Honorable Board of Commissioners for the Care of the Indigent Insane:

GENTLEMEN: I have the honor to submit the Eighth Biennial Report of the Nevada Hospital for Mental Diseases, for the term ending December 31, 1898.

MOVEMENT OF POPULATION.

At the beginning of the term there were 149 males and 45 females; total, 194.

During the term there were admitted: Males, 40; females, 22; total, 62; and 1 male patient, who had eloped, returned. Total number under treatment, 257. Of these 30 were discharged—17 males and 13 females; and 31 died—25 males and 7 females. Eloped, 11 males, of whom 4 returned. Average for the term, 194.15. Term closes with 141 males, and 48 females; total, 189.

CONDITION OF THOSE DISCHARGED.

Recovered, 20, a percentage of 32.26 to total number admitted, and 7.78 per cent of total number under treatment; 7 were discharged improved, 1 unimproved, and 2 not insane, one of the latter being a case of feigned insanity to avoid consequence of crime committed. He is now serving a term in the State Prison.

DEATHS.

The death rate for the term was 12.06 per cent of total number under treatment.

The causes of death were: Apoplexy, 7; brain softening, 1; bronchitis, acute, 2; diarrhea, chronic, 1; enteritis, 1; exhaustion of dementia, 1; heart failure, 1; hemorrhage of the stomach, 1; paresis, 3; senility, 3; septicæmia, 1; status epilepticus, 1; suffocation (in epileptic convulsion), 1; tuberculosis, 6; uræmia, 1. Total, 31.

The average age of those who died was 57.25 years.

The increased death rate for the term can readily be accounted for in glancing at the ages of those who died, to wit:

Over the age of 80.....	2
Between the ages of 70 and 80.....	6
Between the ages of 60 and 70.....	4
Between the ages of 50 and 60.....	11
Between the ages of 40 and 50.....	5
Between the ages of 30 and 40.....	3

Several of the number were brought to the Hospital in a dying condition. One old lady, besides a long journey in the cars, having traveled seventy-five miles in a stage coach; another, 65 years of age, suffering with chronic diarrhea, made a similar trip, the only marvel being that

they lived to reach their destination. Of the two patients dying of acute bronchitis, one was a female 72 years of age, and the other a male aged 82. The case of suffocation occurred in an epileptic, who had convulsions only at long intervals. In the meantime he was a good worker, and was given the liberty of the grounds. One day he failed to put in his appearance at dinner, and, upon search being made, he was found lying with his face in the sand, dead. He had evidently had a convulsion and fallen on his face in the sand; being unable to turn over, he suffocated.

ELOPEMENTS.

During the past term there have been eleven elopements, all males and of the class who are termed "trusties," that is to say, such as are about well, simply being kept under observation prior to being discharged, or perfectly harmless cases; of this number four were returned and the location of most of the others became known, but as they were engaged in industrial occupations, it seemed unjust to disturb them.

FINANCIAL STATEMENT.

When the Legislative Committees visited the Hospital two years ago, I told them that no matter what appropriation they made for support of the institution under my care, there should be no deficiency; that, in the first place, I should see that all the wants of the inmates were supplied, then if I had money for repairs and improvements they should be made; if there was none, they should be left undone. I have kept my word. I asked for \$75,000, and \$71,500 was the amount allowed. Of this we have expended \$71,491 64, leaving an unexpended balance of \$8 36 in the treasury, but I have been compelled to forego a number of repairs and improvements.

During the past term there have been collected from pay patients, and other sources, and paid into the State Treasury, \$1,674 72, which amount, deducted from the amount expended, makes the actual cost to the State \$69,816 92, and as there were 194.15 patients per day, the cost per capita per diem was 49.19 cents.

While the above apparently shows an increase in the cost per capita per diem, it is more fancied than real. The amount expended for insurance, \$1,517 42, paid triennially (none being paid last term), and the cost of the lady night watch, also added last term, more than cover the difference. Now, when we add the fact that the raise in the price of meats increased our expense one thousand dollars a year, and that the low stage of the river necessitated the running of all machinery by steam, instead of water power, it will be seen that the last was an exceedingly economical term.

EXPENDITURE OF SPECIAL APPROPRIATION.

There was a special appropriation of \$3,500 for new boilers, engines and storage battery.

Of this sum \$1,010 70 was expended in securing thirty-six elements for the storage battery, making a total of forty-eight cells. By running the dynamo three hours a day we now have a very fair light.

The balance of the allowance was expended in securing one tubular stationary steel boiler with fittings, one vertical and one horizontal engine with necessary valves, traps, etc.; also six hundred feet of two-inch gas pipe and magnesia covering for the same to convey steam

from the boiler to the power house 250 feet distant. It was also found necessary to enlarge the boiler house, all of which was completed in the summer of '97, so that we have since been amply provided with steam for heating and power purposes.

STATEMENT.

The appropriation was		\$3,500 00
<i>Expended as follows:</i>		
Brick	\$132 19	
Lime	32 25	
Freight on boiler front and doors	6 15	
Corrugated iron	42 00	
Boiler front	9 24	
Machine bolts	2 00	
Castings	76 00	
Grate bars and boiler stand	32 82	
Contract for building addition to boiler house	349 00	
Unloading boiler and engines	10 00	
Drayage on bricks	9 75	
Mason work on furnace	308 50	
Machine work	15 00	
Lumber, common	36 90	
Door, windows and frames	12 00	
One tubular stationary steel boiler with fittings, one vertical engine, one horizontal engine, 600 feet 2-in. gas pipe, 600 feet 2-in. magnesia covering, two 2-in. expansion joints, two 2-in. globe valves, one Flyn steam trap, delivered F. O. B. cars, Reno	\$1,561 00	
Credit displaced machinery, \$137 50; labor, repair on smokestack, \$8	145 50	
	1,415 50	
Electric storage battery, 36 elements storage battery, freight prepaid to Reno	1,010 70	
		\$3,500 00

The engines, etc., were purchased by the Board, the contracting party agreeing to take the displaced machinery as above. On arrival of the material, the smoke stack was found damaged; the cost of repair was deducted from contract price.

SPECIAL APPROPRIATION.

There will be required for the term 1899-1900 a general appropriation of \$75,000, and in addition thereto a special appropriation of \$7,600, for the following purposes:

Fire apparatus	\$1,750 00
Granite porch (main entrance)	2,500 00
Two large vehicles, etc.	1,500 00
Library	500 00
Building for carpenter and paint shop	750 00
Milk cows	600 00
Total	\$7,600 00

The porch in front of the building, at the main entrance, is of wood. It has been repeatedly repaired and repainted until now it almost requires rebuilding. It would cost between four and five hundred dollars to place it in good condition. Nor should the danger from fire be overlooked. It is a constant source of expense for painting, etc. I have plans prepared for a proper porch of granite, with tiled flooring, which would be an ornament to the building, and once constructed will be of no further expense.

Two large vehicles are wanted for outings. From them the patients would derive great benefit, and all similar institutions are so provided. With harness, etc., they will cost \$1,500.

SPECIAL APPROPRIATIONS FOR FIRE APPARATUS.

The building has quite a large quantity of fancy cotton fire hose. Soon after taking charge I tested it and found that when water is first turned on it leaks like a sieve. As it is of utmost importance that an abundance of water should be obtainable at the beginning of a fire, the hose now on hand should be used for gardening purposes and a supply of cotton rubber-lined hose take its place.

Nine good fire extinguishers have been placed in various parts of the building, but as many more are required. New fire plugs should be put in the place of the present leaky, defective ones. Five hundred feet of large caliber hose for the outside is required. A low estimate of the cost of these articles is \$1,750.

CARPENTER AND PAINT SHOP.

When adding a section to the boiler house to accommodate the new boilers, a portion of the old building was converted into an excellent blacksmith shop. But we are still as badly in need of a proper carpenter and paint shop as when the last report was written, and for this purpose I have elsewhere recommended an appropriation of \$750.

MILCH COWS.

We are badly in need of additional milch cows and I renew my previous recommendation for six hundred dollars for that purpose.

LIBRARY.

I presume ours is the only institution of its kind and size without a library. Fully 50 per cent of our inmates are readers, and eagerly devour everything that comes within their reach. I doubt if there is anything that can be done for them which would be more beneficial than to provide them with proper material.

We have three handsome reading-rooms, each containing, in addition to tables and chairs, a handsome book-case.

I would suggest an appropriation of \$500 to fill them.

FARM AND GARDEN.

Our farm and garden has been fairly productive during the past term—as will be seen by reference to statistical tables. The preventive of greater success being the scarcity of water, which each year becomes more evident.

OUR WATER SUPPLY

Is taken from what is known as the Sullivan-Kelly ditch; of which the State acquired by purchase a one-sixth interest. Each year water becomes scarcer and correspondingly higher. Mr. James Sullivan owns a one-fourth interest in the above-named ditch, to which the Government surveyors have assigned between 1,600 and 1,800 inches of water. He offers to sell it to the State for nine thousand dollars. I believe the offer a good one, and that the returns from the same would amply repay the outlay. During the past summer fuel for the power house,

costing not less than one hundred and fifty dollars per month, could have been saved if we possessed this property, and our crops could have been increased fully 50 per cent. I therefore recommend its purchase.

PHYSICAL CONDITION OF PATIENTS.

The physical health of our inmates has been excellent during the past term, a few cases of slight colds and malarial fever covering the range of their acute ailments.

TREATMENT.

Relief of mental conditions consists largely in inducing healthful, mental and physical efforts, together with proper hygienic conditions, regular habits, bright and cheerful surroundings, etc., and such has been the course pursued during the past term. By reference to Table XVIII it will be seen that 52.81 per cent of our patients were engaged in useful occupation of various kinds; per example as will be seen from matron's report hereto attached, 2,266 garments were made in the female department in addition to a vast amount of repairing; while in the male department, all the crops planted and harvested, all vegetables raised, and flowers grown, together with a large amount of mechanical and ward works, were performed under the supervision of the employees.

MECHANICAL RESTRAINT

Has been found necessary in a very limited number of cases and could be entirely done away with by having a sufficient number of attendants.

AMUSEMENTS.

The usual outdoor amusements during the summer and indoors during the winter have been indulged in, together with extra dinners of fowl and other delicacies on holidays, have caused them to be looked forward to with interest by the inmates.

At Christmas-tide we have had trees with gifts for everybody, together with musical entertainments kindly furnished by friends.

RELIGIOUS SERVICES

Are regularly held on the second and fourth Sundays, to the satisfaction of many inmates. The services rendered are volunteer and will be duly acknowledged under the proper head.

VISITS AND VISITORS.

The Hospital is open to visitors daily, between the hours of 10 and 11:30 A. M., and 2 to 4 P. M.

Visits to relatives and friends may be made during the same hours, except when they are found to be injurious to the patient; and are limited to one-half hour.

PROVISION FOR DISCHARGED PATIENTS.

For many years past it has been the custom of the Superintendent of this institution to call attention to the necessity for making some provision for discharged patients. But up to the present time these requests have passed unheeded. Why, is beyond my comprehension, for there are no more liberal people to be found in the world than those of

our Commonwealth. Nor is the plea an unjust one. Many of the inmates are brought from distant parts of the State. They have no friends near, no money and only the clothes they have on their backs; they have just recovered from mental ailments which rendered them unfit for the battles of life, and are still in a state of mental feebleness, which ill fits them for the great strain required to re-enter the struggle for existence, and any unnecessary burden is liable to cause the mind again to give way. So well is this understood in the East, that there exists an organization to assist those who are discharged from hospitals and asylums for the insane; but here no provision is made for them; in fact, they are treated worse than convicts, for the latter receive fifteen dollars and a suit of new clothes when discharged. In the name of humanity let this condition be rectified, and the discharged patient be provided for and return them to the point from which they have been committed, if desired.

UNFAVORABLE CHARACTER OF ADMISSIONS.

"There was an unusual number of old, harmless, incurable, idiotic and imbecile patients admitted, who should have been kept at their homes, or maintained by their respective counties. This is an imposition on the State's charity, and seems to be growing from year to year. County authorities are anxious to relieve the county of the expense of maintaining this class, and relatives seem heartless enough to seek the opportunity thus afforded to rid themselves of the trouble of caring for the decrepit or afflicted members of the family."

The above is reported from the Forty-fourth Annual Report of the Western Kentucky Asylum for the Insane, and could have justly been penned in our office, so accurately does it describe existing conditions. So it seems that human nature is the same in Kentucky as in Nevada, and I have no doubt that every State in the Union could testify to a similar condition. Then follows a number of examples, but we will furnish our own: An epileptic idiot, aged 17, unable to cross the room without assistance, was committed, because dangerous to others. A woman, aged 32, an imbecile, was committed because she was lascivious. An old man of 83, suffering with lumbago, unable to rise without assistance, was dangerous to the lives of others. Another old man of 75, who had been an inmate of County Hospital, with stricture of the urethra, was dangerous to be at large, and so on. It is perhaps unnecessary to mention that all these cases were committed as indigents. The question arises: To what cause is this condition due?

DANGEROUS LEGISLATION.

In 1889 the Legislature by enactment enabled the County Clerk, in absence of the District Judge, to commit insane patients. In a majority of instances the Clerk has no knowledge of the law, and upon the testimony of a convenient physician promptly commits the patient. While the whole civilized world is throwing additional safeguards around the liberty of its citizens, Nevada, by the above Act, makes it an easy matter to railroad its people into the Insane Asylum. There is an additional incentive to unload county paupers. From the time of commitment the patient becomes a charge upon the State, which pays all costs for transportation, etc.

HOW TO REMEDY THIS CONDITION.

It is much easier to find a bad condition of affairs than apply a remedy. Fortunately the matter is easily solved.

First—Repeal "An Act to further provide for commitment of insane persons to the insane asylums," approved February 21, 1889, granting to the County Clerks the power to commit, in the absence of the District Judge. This may work a slight financial disadvantage to some of the counties, but is amply compensated for in the added protection to the liberty of the citizen.

Second—Amend an Act entitled "An Act relating to the transportation of indigent insane persons and convicts," approved February 15, 1875, so as to strike out that portion which makes the transportation and costs of delivering a patient to the Hospital a tax upon the State, and make it, as well as the cost of their return to the point from which they are committed, a tax upon the county.

The Superintendent can do the rest. He has no right to refuse to receive patients legally committed, but he is the judge of how long they shall be detained.

ATTENDANTS.

There are at present in the Hospital about 190 patients, the number during the past term having fluctuated between that and 200, and only 8 attendants.

The average number of attendants in similar institutions in the United States is 1 to 14½; in the State of New York, 1 to 7½; in our Hospital, 1 to 24½. This is manifestly unjust to both patients and attendants. Take our female wards, for example: During the past term we have had as high as 52 inmates, 27 in one ward, and 25 in the other, and only one attendant to each ward, and when we stop to consider that the females are quite as difficult to care for as the males, it is easy to realize that theirs has not been an enviable lot.

When this institution was first organized there were two attendants to each ward, or twelve in all. There were then 160 patients. Since then their number has increased 25 per cent, while the number of attendants has decreased 33⅓ per cent, all this in the interest of so-called economy. An increase of four attendants, two male and two female, would enable us to treat both patients and employees more like human beings. The care of the insane is one of the noblest charities of the State, and no reasonable effort for their comfort and care should be omitted.

THE TRAINING SCHOOL COURSE

Begun during the previous term has been continued during the last, and, while it has made considerable work, has amply repaid me by a greatly improved service.

LEGISLATION REQUIRED.

Owing to various causes, including the destruction by fire of the State Printing Office, my last report failed to reach the Legislature until a day or two before adjournment, hence too late to be acted upon. The two years of experience since acquired emphasized the necessity for the legislation then suggested, to wit:

LEGAL SERVICE ON INMATES.

In a number of cases efforts have been made to effect "personal service" on inmates of the Hospital in matters affecting their estates. In all such cases I have refused to permit such service to be made, on the grounds that an insane person has no legal existence; that by reason of their insanity they are mentally incompetent, and by reason of their commitment they are physically unable to appear and make legal answer.

But it appears that in case of application for guardianship, under our statute, personal service is necessary. This should be amended, making the Superintendent of the Nevada Hospital for Mental Diseases guardian of the person and estates of all persons committed to the Hospital, unless notice is served on him of the appointment of a guardian by the Courts, and all legal service should be made on the guardian, and any attempt to serve legal papers on insane persons, who have been adjudged insane and committed, should be made a crime.

If there is a class of persons in the State who deserve the most ample protection that can be thrown around them, it is the insane, and, as it is no unusual occurrence for designing persons to endeavor to possess themselves of their property, I have always used every means in my power to prevent any advantage being taken of them. Whether I have always been *legally* right, I am not prepared to say. I therefore ask that such legal means be given me for the better protection of these unfortunate wards of the State.

BRINGING INSANE INTO THE STATE

Should be made a crime, as quite a number have been brought from adjoining States and committed to the Hospital.

RELIEF FROM JURY DUTY.

There are but sixteen male employees connected with the institution, not one of whom can be spared without impairing the efficiency of the force, or endangering the lives of the inmates or the property of the State. During the past term a number of the employees have been drawn for jury duty, and, in spite of my representing the condition, as above, one was compelled to serve. It is true no serious consequences followed, but it was "more good luck than good management," and not believing it to be the purpose of the law to so jeopardize lives and property, I would advise the passage of an enactment exempting the employees of this Hospital from jury duty.

COLLECTION FROM PAY PATIENTS.

Under our statutes only the indigent are entitled to gratuitous care from the State. All others are at present required to pay fifteen dollars per month (amount fixed by the Commissioners). The Court in its commitment sets forth who of the relatives is able and shall pay the amount.

There is now due the State for such maintenance and care \$6,180 50, and an effort should be made to enforce collection of the same.

TAILORING DEPARTMENT.

During the past term, Mr. Thos. Speck, who for many years has kept

the males supplied with clothing and underwear, did yeoman service, as will be seen by the annexed statement. He made 1,385 garments.

ACKNOWLEDGMENTS.

Our thanks are due and tendered as follows:

Rev. Samuel Unsworth and choir of Trinity Episcopal Church for religious services on the second Sunday of each month.

To the Epworth League for similar services on every fourth Sabbath day.

LIBRARY.

During the summer of 1897 Hon. S. P. Davis, wife and daughter spent part of a day visiting us. Mrs. Davis manifested a special interest in the unfortunate wards of the State, and among other things called to her attention was the need of a library and the absence of an appropriation for that purpose. Immediately upon her return to Carson City there appeared in the Appeal, edited by her husband, a notice calling upon the people, and particularly the ladies of the State, to assist her in supplying this want. She requested those having spare volumes to forward them to her and she would see that they reached their destination. She also had printed a neat label with name of the Hospital, number, and name of donor, pasting one in each volume that passed through her hands, and forwarded them to the Hospital. There was a liberal response to the call, and several hundred volumes are now on the shelves of the book-case in the female ward, I feeling that, as to a woman's effort they were due, the members of her own sex should reap the first benefit. But the circulation of the volumes has not been confined to that department, for many a male has had his hours of solitude brightened through the thoughtfulness of this kind friend. And when the recording angel shall in due time be called upon to produce the records of her good deeds, this will not be found the least to her credit.

Those who kindly responded to the call were:

Mrs. J. W. Adams	Carson City
Mrs. Mary Ash	Carson City
J. H. Blossom	Battle Mountain
Judge Belknap	Carson City
Miss Pearl Cowan	Carson City
E. J. Cahill	Carson City
P. Cavanaugh	Carson City
