Open-file Map 81-2 J

**GEOCHEMICAL MAP SHOWING
DISTRIBUTION OF LEAD
IN THE TONOPAH AREA**

L.J. Garside and H.F. Bonham, Jr.

*NBMG Bulletin 92 contains a complete
discussion of the geology of this area.*

The information on this map should be considered preliminary.

ppm Pb

- < 20
- 20-100
- 100-500
- > 500

Rock samples were collected throughout the area to assess the abundance and distribution of elements that outline mineralized systems and may indicate exploration targets. The samples, except for background samples, were collected from the most intensely mineralized rock in any given locality, and are from shear or fault zones, fractures, Jasperoid bodies, veins, and altered rocks. None of the samples necessarily represent a body of rock large enough to be mined economically.
