

LASER PRINTED POLICY FORMS

This informational bulletin is in response to questions received by the Nevada Insurance Division from several insurers regarding the introduction of laser printed policy forms and their related filing requirements.

The filing requirements can be described as either, for:

- 1. Previously approved filings resubmitted as laser printed; or
- 2. Newly filed forms produced with a laser printer.

PREVIOUSLY APPROVED FORMS

Generally speaking, a previously approved form does not need to be refiled with the Division for approval if the form has been reprinted on a laser printer. Only an informational filing letter with the appropriate filing fee and FFD 100 form are required to notify the Division that the previously approved copies will be replaced by laser printed copies. Multiple forms may be filed ***per letter*** in a package format or filed individually with a separate filing letter. Fees will be assessed***per filing*** letter.****(See Informational Filing Fee Scale below.)***

A new filing is required if the form is renumbered or is replaced by a new form, and will be processed by the Division as a newly filed form. A resubmission of the filing is required if a change in print size would result from laser printing. Print size includes bold face print or shading. Reduction or enlargement of page size does not require refileing.

Informational Filing Fee Scale

Single Rider.....	\$10.00
Single Policy or Package of Policies and Riders.....	\$25.00

NEWLY FILED FORMS

All newly filed forms require copies for the Division's review and approval. The Division is primarily concerned with the content of policies and their readability. Aesthetic changes or additions to cover pages and the format of text is, for the most part, at the discretion of the company. Companies may elect to submit standard print copies for approval. A final laser copy will not be required, if the filing letter specifies the final form will be produced by laser printer. See: NRS 680B.010 for the relevant fee schedule.

If you have further questions regarding filing requirements for laser printed policies, please feel free to contact the Property and Casualty Section or Life and Health Section of this office.
