

NEVADA DEPARTMENT OF TRANSPORTATION

2004
DATA

ANNUAL VEHICLE MILES OF TRAVEL

In Cooperation with
U.S. Department of Transportation
Federal Highway Administration,
Nevada Division

March 2006

Kenny C. Guinn
Governor

Nevada Department of Transportation
Roadway Systems Division
1263 South Stewart St.
Carson City, Nevada 89712
(775) 888-7447

Jeff Fontaine, P.E.
Director

INTRODUCTION

The Purpose of this publication is to provide transportation analysts, planners and other researchers a ready reference for Annual Vehicle Miles of Travel (AVMT) used for a multitude of applications. AVMT is calculated by multiplying the Annual Average Daily Traffic (AADT) by the roadway segment in centerline miles and then multiplying this figure by 365 to produce “segment” AVMT. Segment AVMT for a route or other category is then summed to calculate a category total. The table of contents will provide the user an easy reference for data summaries most commonly used, including county and Functional Classification totals.

The AVMT data has been developed by the Nevada Department of Transportation (NDOT), Roadway Systems Division in cooperation with the U.S Department of Transportation (USDOT), and the Federal Highway Administration (FHWA). It is based on the Highway Performance Monitoring System (HPMS) sample plan and is considered representative of all roadway functional classifications regardless of ownership. Traffic volume data was developed in accordance with Nevada’s Traffic Monitoring System and includes all public roadways statewide.

Historically, some of the more important applications of AVMT data have been its use in the formula utilized to distribute gasoline taxes to local governments and as a foundation of every cost allocation study developed at the Nevada Department of Transportation for the past 20 years. These studies provide the Nevada Legislature critical information when determining appropriate taxes and user fees relevant to highway transportation. Other important uses include, but are not limited to, the calculation of collision rates in conjunction with collision data, truck travel calculation, economic growth indicators, and as a check against tax reporting on diesel fuel consumption.

You may notice some extreme changes in this year’s data particularly in functional class. The majority of these changes are due to the several hundred functional classification and rural/urban boundary changes mandated by the United States 2000 census. The Roadway Systems Division made these extensive changes in functional class and rural/urban boundaries in cooperation with the FHWA and Regional Transportation Commissions (RTC).

Questions regarding the development of this report should be addressed to the NDOT Roadway Systems Division at (775) 888-7675. Questions regarding Nevada’s Traffic Monitoring System should be addressed to the Traffic Information Systems Division at (775) 888-7443.
