

Major Mines of Nevada 1990
The Nevada Department of Minerals
1991

This is the second of an annual series of summary reports on major mines of Nevada. Information on employment and production for the calendar year 1990 was provided by the individual mine operators. The Nevada Department of Minerals maintains a complete register of Nevada mines; for further information, contact them at 400 W. King, Suite 106, Carson City, Nevada 89710 or call (702) 687-5050.

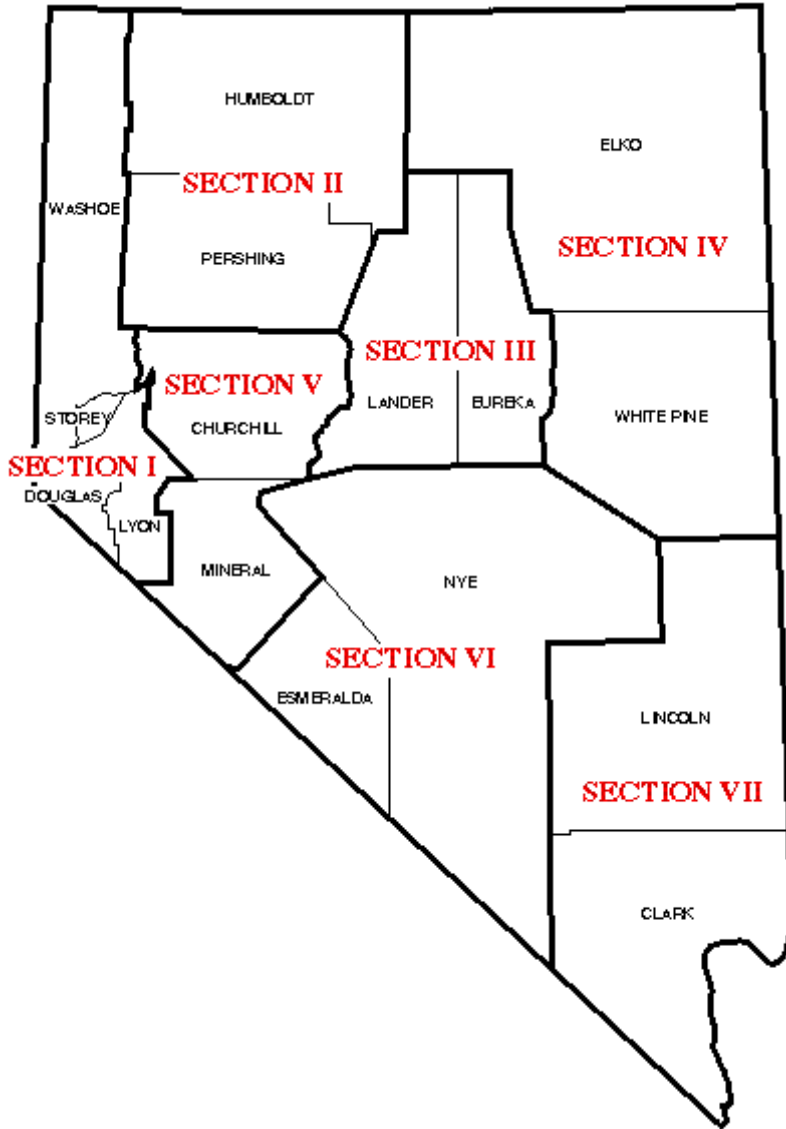

THE NEVADA DEPARTMENT OF MINERALS

The Nevada Department of Minerals is responsible for administering programs and activities to promote, advance, and protect mining and the development and production of petroleum and geothermal resources in Nevada. The department's mission is to administer programs and activities to further the responsible development and production of the state's mineral resources to benefit and promote the welfare of the people of the state. The Commission on Mineral Resources establishes policy for the Nevada Department of Minerals which consists of the Executive Director's Office, the Division of Industrial Relations, Public Affairs and Administration, the Division of Regulation, and the Division of Abandoned Mine Lands.

The Division of Industrial Relations, Public Affairs and Administration is involved in a wide array of activities relating to the minerals industry. The division staff compiles annual data on all active mines in Nevada and maintains the state's mine registry. Information concerning mining operations and production is made available to the public through this yearly publication. The division also produces educational documents and materials concerning many aspects of the mineral industry, which are available upon request. Other division responsibilities include participation in governmental activities affecting policies and laws concerning the minerals industry and resource development.

The Division of Regulation is responsible for permitting, inspecting, and monitoring all oil, gas, and geothermal drilling activities on both public and private lands in Nevada. Division staff also monitors production of oil, gas, and geothermal resources to insure proper management and conservation. The division also administers the state's reclamation bond pool program.

The Division of Abandoned Mine Lands provides for public safety through a program to identify and rank dangerous conditions which resulted from mining practices which took place at mines that are no longer operating, and to secure dangerous orphaned sites. The division also has an ongoing program to educate the public to recognize and avoid those hazards.
