STATE MAINTAINED HIGHWAYS DESCRIPTIONS AND MAPS

(aka Description Index)

Note: Maps, Wikipedia and other web based resources do not reflect the most current information regarding the state's maintained rotues. Changes to the routes can occur so quickly they may not be reflected in these resources for quite some time. State System updates and changes are announced via a quarterly memo and also on the NDOT Roadway Systems SharePoint site under Documents. However, if you are looking for the most up-to-date information it's best to contact us via e-mail or phone.

INTRODUCTION

This publication was created to provide users with a single source reference for the current State System. It contains the official description and mileage for all State maintained routes and should not be used to determine road ownership. If you are looking for information regarding ownership, please contact the Nevada Department of Transportation's (NDOT) Right-Of-Way Division at (775) 888-7470. The mileage listed is based on a linear reference system measurement and should not be used for design purposes. For mileage that corresponds to milepost locations and engineer stations, please see the Milepost Index located on the iNDOT page under "Applications".

Section one of this document includes the route numbering, route numbers by county/city, mileage totals by route and by rural/urban designation, National Highway System (NHS) and a list of acronyms. Section two contains a list of the State maintained routes by county to include maps, cardinal direction, begin and end points and mileage. Section three contains a summary of the routes by county and rural/urban designation and a cross reference linking the current State System to previous and current route aliases. As changes to the State maintained road system occur, the Roadway Systems Division will notify NDOT division heads via a Quarterly System Change Memorandum. Copies of these notifications can be found on the NDOT SharePoint site under Roadway Systems.

Also included are the Route Master Identification (RMID) numbers that are part of a program that assigns a unique number to segments of line work in the geospatial world of the State Road Network. The State Road Network is established, maintained and verified by the Roadway Systems Division.

Any questions regarding this document or for additional copies please contact Roadway Systems at (775) 888-7447. You may also obtain an electronic copy of this document by visiting the NDOT website at http://www.dot.nv.gov under the Documents tab, Planning and Data Collection related and then Studies and Reports. We also have a link to this document on our SharePoint site.

*** This book contains centerline miles***
