ANDREW MAUTE, SUPERINTENDENT

1905

LETTER OF TRANSMITTAL.

CARSON CITY, NEVADA, January 19, 1905.

HON. JOHN SPARKS, *Governor of Nevada.*

DEAR SIR: I have the honor to transmit herewith the Report of the Hospital of Mental Diseases at Reno, Nevada, for the years 1903 and 1904.

Yours, respectfully,

F. L. WILDES,

Secretary Board of Commissioners for Care of Indigent Insane.

LIST OF OFFICERS.

BOARD OF COMMISSIONERS.

HON. JOHN SPARKS	Carson City, Nevada
HON. S. P. DAVIS	Carson City, Nevada
HON. D. M. RYAN	Carson City, Nevada
HON. F. L. WILDES, Clerk	Carson City, Nevada

HOSPITAL OFFICIALS.

S. C. GIBSON, M.D., Superintendent	Reno, Nevada
J. G. DRISCOLL, Supervisor	Reno, Nevada
MRS. IDA SHEEHY, Matron	Reno, Nevada
JOHN BURNS, Engineer	Reno, Nevada

BIENNIAL REPORT.

RENO, NEVADA, January 2, 1905.

To the Honorable Board of Commissioners for the Care of the Indigent Insane of the State of Nevada, Carson City, Nevada.

GENTLEMEN: I have the honor to submit the Eleventh Biennial Report of the Superintendent of the Nevada Hospital for Mental Diseases, for the term ending December 31, 1904:

MOVEMENT OF POPULATION.

At the beginning of the term there were 142 males and 57 females; total, 199.

During the term there were admitted: Males, 39; females, 17; total, 56. Total number under treatment, 255. Of these 25 were discharged—19 males and six females; and 44 died—33 males and 11 females. Average population for the term, 197.77. Term closes with 129 males and 57 females; total, 186.

CONDITION OF THOSE DISCHARGED.

Recovered, 20, a percentage of 35.71 to number admitted, and 7.84 per cent of total under treatment.

DEATHS.

The average age of those who died was 69 years.

Between 40 and 45 years of age	6
Between 50 and 55 years of age	6
Between 55 and 60 years of age	6
Between 60 and 65 years of age	9
Between 65 and 70 years of age	4
Between 70 and 80 years of age	10
Between 80 and 90 years of age	3
Total	44

The causes of death were: Apoplexy, 2; abscess of liver, 3; Bright's disease, 2; exhaustion of insanity, 6; general paralysis, 5; inanition, 5; enteritis, 1; paresis, 2; pneumonia, 2; senility, 5; cerebral softening, 4; syphilis, 3; uremia, 2; epileptic convulsions, 1; tuberculosis, 1. Total, 44.

FINANCIAL STATEMENT.

From pay patients there was collected during the term the sum of \$1,887.65. Deducting this from the total expended, \$78,000, leaves an actual cost to the State of \$76,112.35 for the 197.77 patients, or an average per capita per diem of 52.75 cents.

APPROPRIATIONS.

The following were the appropriations for this term:

General appropriation	\$78,000
Completion of Hospital	\$2,500
Repairs	\$1,900

GENERAL APPROPRIATION.

This amount was barely sufficient to properly maintain the institution. When I assumed charge of affairs in November there was remaining of the above appropriation of \$78,000 the sum of \$6,171.12 to cover expenses for the two remaining months, November and December. The monthly expenditures up to that time had been \$3,250. Many needed repairs had been left undone, because this amount had proved insufficient to provide maintenance for the institution, and at the same time to make the desired improvements and repairs. I have enumerated elsewhere the most essential repair work to be done. This work is now indispensable, and will necessitate an increased appropriation for the ensuing term. Furthermore, as will appear in another part of this report, I have regarded it as absolutely necessary to increase the patients' dietary. For these reasons, I recommend an appropriation of \$86,000 to meet the proper expenditures for the next two years, and I deem this amount by no means excessive.

REPAIRS AND IMPROVEMENTS.

Since the last report was submitted considerable painting has been done about the buildings, which has not only greatly enhanced the good appearance of the premises generally, but was absolutely requisite for their preservation from the ravages of weather-stain and decay. For this purpose one and sometimes two painters were off and on carried on our pay-roll. It is to be regretted that the meagerness of our appropriation made the retention of their services all the year round an impossibility. I regard the permanent employment of at least one painter an absolute necessity to keep the painting in proper condition.

FIRE APPARATUS.

The fire hose provided for the outside of the buildings is at this writing completely worn out, and we have been obliged to purchase two hundred feet of two-inch hose to replace that which was found to be unserviceable. We actually need about five hundred feet of one-inch hose additional. The stables are at present without any fire protection. A two-inch main pipe should be run from the tank to both the horse stable and the cow barn, and a hydrant should be located at each place. Also a hose cart and reel should be provided for our two-inch hose and a suitable house built for sheltering the same. When these necessary improvements are made, our fire apparatus will be in very fair condition, and somewhat better protection will be insured to our outbuildings in the event of fire.

MAIN BUILDING ROOF.

The roof of the main building is in a leaky condition. The building needs a complete new asphalt and tarred roof. About \$1,000 will be required for this purpose.

HAY.

It has been the custom of late years to dispose of the surplus hay by sale. However, the increase in the number of dairy cows which we have recently made will obviate the necessity of selling any at present. We have on hand now 175 tons of hay, and this quantity I consider is not more than sufficient for our need.

TOOLS AND IMPLEMENTS.

I discovered upon taking charge of the institution an embarrassing scarcity of necessary mechanics' tools and farm implements. About six hundred dollars will need to be expended to equip us with needful tools and implements. This outlay will have to be made forthwith to keep our work progressing.

OTHER DIVERS REPAIRS NEEDED.

The plastering in some parts of the buildings is in a bad condition, and needs repair. The kitchen plastering especially needs attention, and should be repaired and calcimined thoroughly; the sewerage system requires an entire overhauling; the bath tubs are old and worn out, and should be replaced with modern improved porcelain-lined tubs; the radiators throughout the building are antiquated and should be replaced with new ones of modern device. All of the flush closets also need to be replaced with new ones, as those now in use are in a condition unfit for further service, and for sanitary reasons are no longer tolerable. I would urge that these repairs be attended to without any delay.

BEDCLOTHING AND WEARING APPAREL.

The bedclothing and wearing apparel, including shoes and hats, are inferior in quality, and in quantity greatly inadequate to the needs of the institution. Much of the clothing is old and threadbare and fit only to be discarded, and a new stock is badly needed. As soon as our appropriation becomes available, I will order immediately the purchase of these indispensable articles.

THE FARM.

A large portion of the alfalfa land will have to be reseeded, and this work has already been begun. The farm is in good condition, and has proved a source of profit most gratifying to the institution. All kinds of vegetables, alfalfa hay, and grain are produced in quantities abundant to our needs. For a summary of the products of the farm for the past season, I refer to Statement No. 6, accompanying the present report.

HOSPITAL BUILDING.

The last Legislature appropriated the sum of \$2,500 for the completion of the Hospital Building located on the Asylum grounds. This amount was expended as follows:

FOR COMPLETION OF HOSPITAL BUILDING.

Lathing and plastering	\$700.00
Lumber and finishing	467.54
Hardware and plumbing	441.73
Labor	440.00
Cement work	229.12
Beds and bedding	150.50
Range	43.75
Fire-brick and clay	20.62
Total	\$2,493.26
Appropriation	\$2,500.00
Expended	2,493.26
Remaining of this fund	\$6.74

REPORT OF HOSPITAL FOR MENTAL DISEASES.

There was a separate appropriation made of \$1,900 for repairs, which was expended as follows:

REPAIRS, 1903-1904.	
Labor	\$1,329.74
Paints and oils	380.52
Hardware	122.34
Lime and cement	67.40
Total	\$1,900.00

THE INVENTORY OF HOSPITAL PROPERTY.

The articles enumerated on the inventory of Asylum property have been appraised in that document at not less than their actual value, and in most cases at their original cost prices. Heretofore it has seemingly been the custom to enter each article on the inventory blank, regardless of its actual value at the time the property return was made out, at its purchase price. As an illustration, I will mention that an old dynamo was valued on the last inventory at \$400. In reality it is worth its actual weight, and no more, as old scrap-iron. Another instance is that of a carriage, which was bought during a former administration, valued on the inventory at \$375. It is worth in its dilapidated and worn-out condition not more than \$15. The printing and stationery on hand (comprising printed blanks, blank-books, etc.) was valued at \$125, whereas, I believe, at no time was the real value of the supply on hand more than \$30. The Asylum account-books were valued on the inventory at \$166. These books are made up of a day-book, journal, ledger, one commitment-book, one death record, one discharge-book, one record index, and the entire lot could undoubtedly be purchased for about \$40. My reason for calling attention to these matters is to prevent misconception and misunderstanding; as heretofore made out, the inventories are misleading as to the value of the articles listed. Without doubt when new the articles were worth the amount specified; but some of them, having been in use for years, are, at the present time, worn out and fit only to be condemned as worthless. Furthermore, the radiators, flush closets, and bath tubs now in use are carried in accordance with the custom on the present inventory at the price for which they were purchased; whereas, as a matter of fact, nearly all are in such a dilapidated state that they will shortly need to be replaced by a complete new outfit. I have deemed it advisable to call attention to these matters, and to put myself on record concerning them, in this way, rather than to set a price, or valuation, upon them lower than that recorded on the inventory.

PATIENTS' DIETARY.

The Asylum dairy at the time of my taking charge was apparently not in a very flourishing condition. The number of cows was insufficient; the yield of milk was totally inadequate for our needs, there being only seventeen gallons of milk produced daily. We remedied the matter at once by purchasing eight head of milch cows, and the supply was, in consequence, increased to fifty gallons per day, thereby enabling us to furnish an abundance of good, rich milk for drinking purposes for the patients' use. In this connection I may state also that we have added to the patients' bill of fare another important article of

food, heretofore, at least for a number of years, absolutely unknown to the patients' tables, namely, butter. The addition of milk and butter in generous quantities to the patients' meals has proved most welcome and gratifying to those directly concerned, the patients themselves. These articles are, after all, merely commonplace, everyday necessities of life provided for and partaken of in every ordinary household, and ought not for any reason to be denied to our wards. I have not regarded them as luxuries, but as plain fare, indispensable to our needs, and I have for this reason put them before our patients. I consider furthermore that good, wholesome butter and milk are the foods par excellence for nourishing and building up the ordinarily exhausted and run-down systems of the mentally diseased. The improvement in their physical condition superinduced by a sufficiency of good, substantial food, in a suitable variety, properly prepared and cleanly served, is followed in almost all cases by decided mental improvement. Oftentimes, mental disease is caused by or aggravated by a lack of proper nourishment, the result of privation, or by the impairment of the constitution by reason of exposure and disease. To restore mental health the body must be built up, the waste repaired and the strength regained, and this is more frequently accomplished by the administration of nutritive sustenance, and the establishment through its agency of a sense of ease, satisfaction and creature comfort than by any course of medication followed to the exclusion of a just regard for the curative effects of good dietary. Hence, the necessity of good food, and plenty of it, in a hospital of this character. In pursuance of this policy, I have found it necessary to increase a portion of our table supplies by forty per cent, while at the same time taking every precaution to guard against extravagance and waste, and insisting at all times upon careful and intelligent economy in the handling of provisions. The following is our dietary list now in vogue, subject to slight alterations, of course, as the seasons demand:

PATIENTS' DIETARY.

SUNDAY.

Breakfast—Corn-beef hash, corn bread, bread and butter.

Dinner—Vegetable soup, roast beef, baked potatoes, pickles, bread, corn-starch pudding.

Supper—Graham mush and milk, bread and butter, cake and tea.

MONDAY.

Breakfast—Hominy and syrup, bread and butter, coffee.

Dinner—Beef stew, potatoes, sauerkraut, bread, bread pudding.

Supper—Oat-meal mush and milk, bread and butter, coffee cake, tea.

TUESDAY.

Breakfast—Stewed apples, bread and butter, coffee.

Dinner—Pea soup, beef stew, potatoes, parsnips, bread, steamed pudding.

Supper—Corn-meal mush and milk, bread and butter, gingerbread, tea.

WEDNESDAY.

Breakfast—Liver or beefsteak and onions, bread and butter, coffee.

Dinner—Corn beef and cabbage, potatoes, pickles, bread pudding.

Supper—Corn-meal mush, bread and butter, cake, tea.

THURSDAY.

Breakfast—Stewed pears, corn bread, bread and butter, coffee.

Dinner—Mutton stew with dumplings, potatoes, squash, bread, rice pudding.

Supper—Cracked wheat and milk, bread and butter, coffee cake, tea.

FRIDAY.

Breakfast—Stewed peaches, bread and butter, coffee.

Dinner—Vermicelli soup, codfish, beans, bread, bread pudding.

Supper—Rice and milk, bread and butter, gingerbread, tea.

SATURDAY.

Breakfast—Codfish balls, bread and butter, coffee.

Dinner—Beef stew, potatoes, bread, carrots or turnips, bread pudding.

Supper—Rolled oats and milk, bread and butter, cake, tea.

CLASSIFICATION OF PATIENTS.

One feature, which, upon assuming charge of this institution, I heartily deprecated, and one which it will be my effort to immediately eradicate, is the indiscriminate intermingling of the various forms and degrees of insanity in the same wards. In conformity with the practice now obtaining in all well-regulated institutions for the treatment of the insane, it is my intention to classify the patients according to their several forms of derangement, and associate together, as far as practicable, on the same halls, only such as are, from the nature of their malady, of similar disposition and habits. Thus the chronic from the acute cases should be separated; the violent and dangerous paralytic should not be forced to associate with the apathetic and mild-mannered melancholiac; the excited paranoiac should live apart from the stupid imbecile; those with homicidal or suicidal tendencies should not be crowded together with those who are only mildly demented. I would reserve one ward for the destructive and filthy patients, and those requiring unusual personal care and attention; another hall for the acute cases, the violent and noisy; still another for the mild and convalescent, and so on, giving to each individual case the environment most congenial to the character of the patient, as far as possible, and the atmosphere most suitable to his condition. Many of our patients are fully able to realize and appreciate their surroundings, and it would be my object to provide whatever comforts and conveniences possible under the circumstances to promote cheerful content and patient resignation to their lot, and aid by agreeable associations and congenial surroundings all possible progress toward recovery.

DISCHARGED PATIENTS.

Another observation which I wish to make, with a strong recommendation attached to it, is in regard to the condition of discharged patients. It happens that upon a patient's recovery he is turned out frequently in a state of destitution, without financial means to tide him over the period when he may again hope to become self-supporting, and too often friendless, and with no one to offer him a helping hand. Such disheartening obstacles are enough to discourage the stout-hearted and able-bodied, but to send forth destitute those who are not robust, after being long pent up in hospital wards, only recently restored to reason, and suddenly burdened with newly acquired responsibilities, seems little short of cruelty. When it is recalled that the discharged criminal,

leaving the walls of the Penitentiary, upon the expiration of his term of sentence, is provided by the State with the respectable sum of twenty-five dollars to help him in his extremity, it seems an unjust discrimination against our patients to set them adrift in the world penniless to shift for themselves. Surely the unfortunate insane, recovering his right mind, law-abiding, never convicted of crime, often a former industrious wage-earner and a good citizen, is as deserving of the charity of the Commonwealth as the released convict, and I urgently recommend upon the ground of common humanity that a small allowance of money be made by the State for the benefit of recovered patients, the same to be given to them upon their discharge from the Hospital.

ACKNOWLEDGMENTS.

Thanks are due to the publishers of the Wadsworth Dispatch, The Nevada State Journal, Reno Evening Gazette, and The Nevada Observer for generously sending copies of their journals gratis for our patients' use.

Grateful acknowledgments are also due the Rev. Samuel Unsworth and the choir of Trinity Episcopal Church, for religious services conducted at the institution.

The thanks of the management are extended to the corps of employees for efficient and faithful performance of duty, without which the institution could not have attained the high standing among hospitals of like character which it now enjoys.

Mr. Thomas Speck, our efficient tailor, who has for years rendered us valuable service, continues to merit commendation for his competent and faithful work, keeping our inmates supplied with the products of his skill—comfortable and well-made clothing and undergarments.

Mr. Richard Weldon, carpenter, is worthy of honorable mention for his industry and usefulness to the institution. His valuable services could not be dispensed with.

Mr. George Couch, Mr. Gus Van Campen, and Mr. Emanuel Davlin, assistants to the engineer, are performing skilled labor of great benefit to the institution, and merit recognition and thanks for their esteemed services.

ELECTRIC LIGHTS.

The number of incandescent lights in the main building is not sufficient to light it properly. The bath rooms and closets are without lights, and some of the halls are either in complete darkness, or only semi-lighted. This condition will be corrected as soon as we have funds which can be used for that purpose.

OUR CHRISTMAS ENTERTAINMENT.

Christmas was celebrated in orthodox style at the institution. A substantial dinner of roasted turkey, with the usual accessories, was provided for patients and employees. A beautifully decorated Christmas tree, loaded down with presents for the inmates, shone forth resplendently in the Recreation Hall, and music and dancing contributed gaiety to the occasion. Entertainment and diversion is, it is well known, a source of great benefit to the insane, and nothing in the way of simple and unostentatious amusement should be spared to relieve the monotony of their lives. Especially at this season of the

year, when charity and good-will so universally abound, it is meet and proper that the unfortunate in our eleemosynary institutions should be remembered with a share of "the good things" that the occasion so generously calls forth.

CONCLUSION.

In conclusion, I will say that it shall be my constant effort to promote the welfare of those committed to my care. Maintenance for these unfortunates of society is provided by legislative enactment, but our charges live not by bread alone, and it is the sacred duty of those burdened more directly with the responsibility of caring for them to provide those other things needful, from which, in a large measure, they are cut off. Compensation must be accorded for those larger activities of which they are, by reason of disease, deprived. Not only the necessities of life must be provided for them, but such occupation and diversion devised for them as will lessen somewhat the daily grind and monotony of their existence. We must let a little sunshine into their darkened lives. Held under restraint, in durance through no fault of their own, the victims of heredity often, and of circumstances beyond all human control, our patients, more than any other class of the afflicted and infirm, are worthy of our charity and sympathetic commiseration, and nothing on our parts should be left undone to alleviate their great sufferings. In every rational way we must strive to gain and merit their confidence; to arouse their faculties; to awaken their interest in their new surroundings, as far as it is capable of being done; to comfort them in their afflictions, and to make them feel at home with us, safe and cared for, as among friends. Much has been done for the insane in our community, but much remains yet to be accomplished; and it is my determination in nowise to fail in the performance of my duty. With the cheerful coöperation of the employees generally, and the cordial support of all interested in the welfare of the Hospital, from whom I shall expect a continuation of their zealous and unrelaxing efforts, I have every reason to feel encouraged at this, the beginning of my administration of affairs here. And what nobler service could engage the energy, inspire the ardor, or command the faithful attention and study of devoted men and women than that of "ministering to a mind diseased," of aiding the dethroned reason to regain once more its sway?

Very respectfully,

S. C. GIBSON,
Superintendent.
