Weather 2018 – Record Dryness/Warmth

Notable Weather Events

- For much of the Southern Great Basin, 2018 was one of the driest years in the last 100 years. It was the driest year ever on record in Utah, with Severe to Exceptional Drought.
- Carryover fuels from the record growth of 2017 encompassing Northern Nevada, Southern Idaho and pockets of Northwest Utah were the significant driver of fires throughout the entire fire season. Fuels reached critical levels by the end of May across the Arizona Strip, and the southern half of Utah and Nevada. By mid-September widespread critical fuel conditions existed across the entire Great Basin including higher elevations of Wyoming and Idaho.
- The entire summer was 2-4 degrees warmer than normal over most of the Great Basin. Very warm and dry weather in June through early July pushed fuels to critical levels across the rest of Northern Nevada and Utah and Southern Idaho.
- Monsoon activity was much weaker than normal across the southern and eastern portions of the Great Basin. Abnormally hot and dry conditions from late July onwards pushed fuels back to critical levels across Southern and Central Utah, reaching record dryness by early September.
- Several significant strong wind events increased large fire growth from the end of July through August and into most of September.
- A shift to a prolonged cool and wet 10- day pattern at the end of September, through the 2nd week of October, produced season ending conditions across the geographic area.

Early Fire Season – Southern Areas:

Exceptional drought combined with a dry spring and low mountain snowpack led critical fuel conditions in June across southern and Central Utah and Nevada.

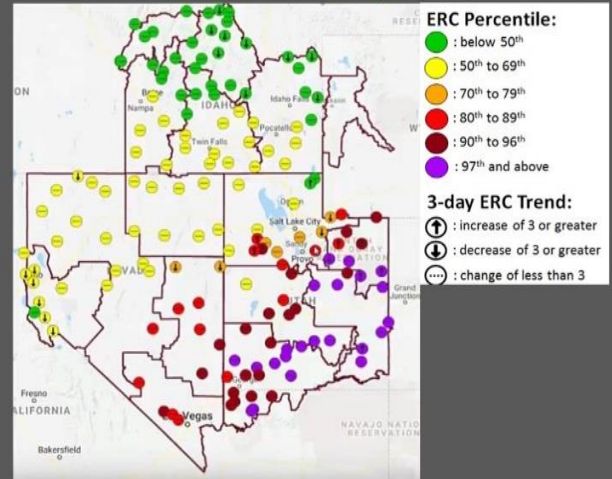

Mid-Summer – Central and Northern Areas:

A late and weak monsoon briefly diminished fire danger across southern areas, but critical fuel conditions developed further north across Idaho and Northern Nevada and Northern Utah.

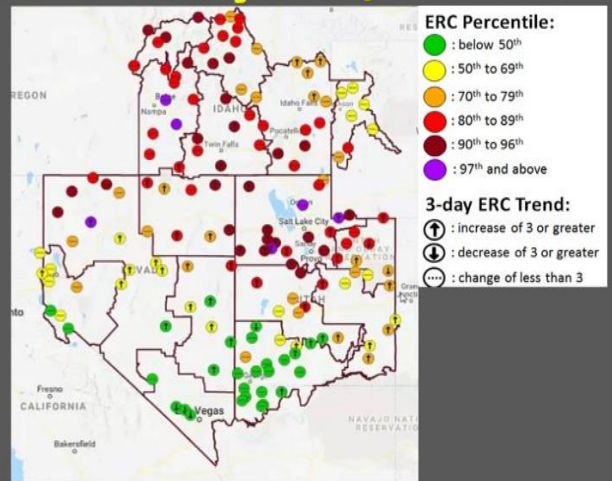

September – Most Areas:

Record late season warmth pushed ERCs to critical levels across nearly the entire area, with near record ERC levels across central areas. This, combined with prolonged strong wind events, contributed to several very large fires across Utah and Wyoming.

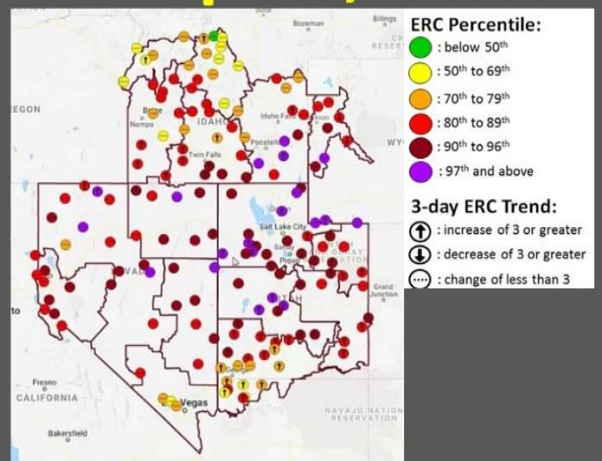

ERC: June 30, 2018

ERC: July 31, 2018

ERC: Sep 28, 2018

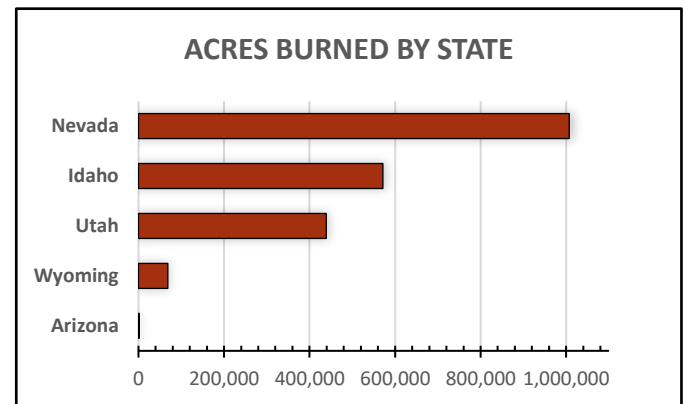

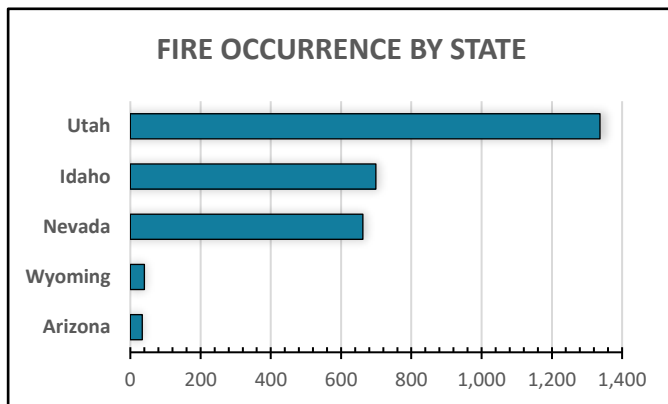

Fire Summary for the Great Basin

The Great Basin had an above average year for fire occurrence and total acres burned during 2018. There were 2,776 fires reported, burning a combined total acres of 2,087,922.

*4 fires for 60 acres in CA-NOD not included in table.

Martin Fire – June 8th 2018 (Final Size 435,569 Acres)

Great Basin Comparison with Historical Averages

The Great Basin experienced 113% of the 5 year average and 91% of the 20 year average for ignitions. 2018 far exceeded the 5 year average of acres burned, burning 186% of the 5 year average and 165% of the 20 year average. It should be noted, however, the geographic area did not approach the number or acres burned in 2007 which were 3,301,599.

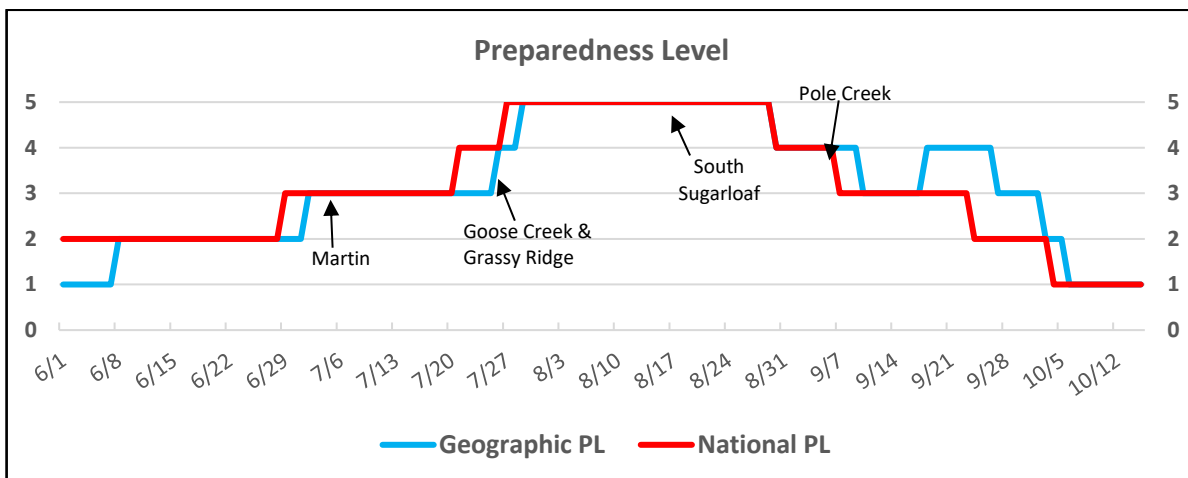

Preparedness Level Review

The Great Basin's Preparedness Level was elevated from 1 to 2 on June 8th. Ironically, this was the same day the increase occurred during the 2017 season. This timeframe is consistent with the historical changes in the Great Basin's Preparedness Levels.

On July 2nd, the Great Basin's Preparedness Level (PL) was increased to PL 3, approximately two weeks later than during 2017. This adjustment was in conjunction with a spike in initial attack and resource commitment. PL 3 held until July 26th when due to the activity in the Great Basin (GB), heavy use and commitment of ALL resources the GB raised to PL 4. The GB remained at PL 4 for three days, before moving to PL 5 on July 29th where it remained there until August 30th.

National Preparedness level markers are included on the display below to illustrate how the national situation was fairly consistent with the conditions experienced within the Great Basin.

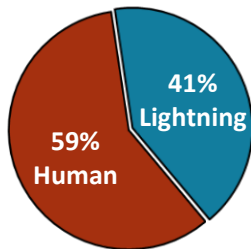

Year End Totals by Cause

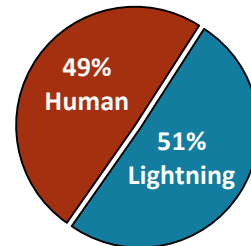

Fire statistics for this report were pulled from the SIT Report. The statistics have not been reconciled with 1202s, FIRESTAT, or other final fire reporting systems. Great Basin reported 2,776 fires for 2,087,922 acres. 1,631 of those starts were human caused while 1,145 were natural ignitions. There was a decrease in human caused fires during 2018. Historically, 38% of all fires reported are human caused, this season 59% of our total fires were human caused.

Year	Human Caused		Lightning Caused		Totals	
	Fires	Acres	Fires	Acres	Fires	Acres
2018	1,631	1,030,761	1,145	1,057,161	2,776	2,087,922

Class A - one-fourth acre or less; Class B - more than one-fourth acre, but less than 10 acres; Class C - 10 acres or more, but less than 100 acres; Class D - 100 acres or more, but less than 300 acres; Class E - 300 acres or more, but less than 1,000 acres; Class F - 1,000 acres or more, but less than 5,000 acres; Class G - 5,000 acres or more.								

Dollar Ridge Fire – August 8th 2018 (UT-NES)

Summary of Fire Activity by Dispatch Center

Large Fire Activity Review

Per the National Mobilization Guide, a large fire is a wildland fire managed for complete perimeter control (Full Suppression) that is 100 acres or larger in timber fuel types and 300 acres or larger in grass or brush fuel types. There are other incidents that require ICS-209s, but the chart below includes only fires that meet the 100+/300+ description and are sorted by start date of the incident.

Large Fire Occurrence by Month

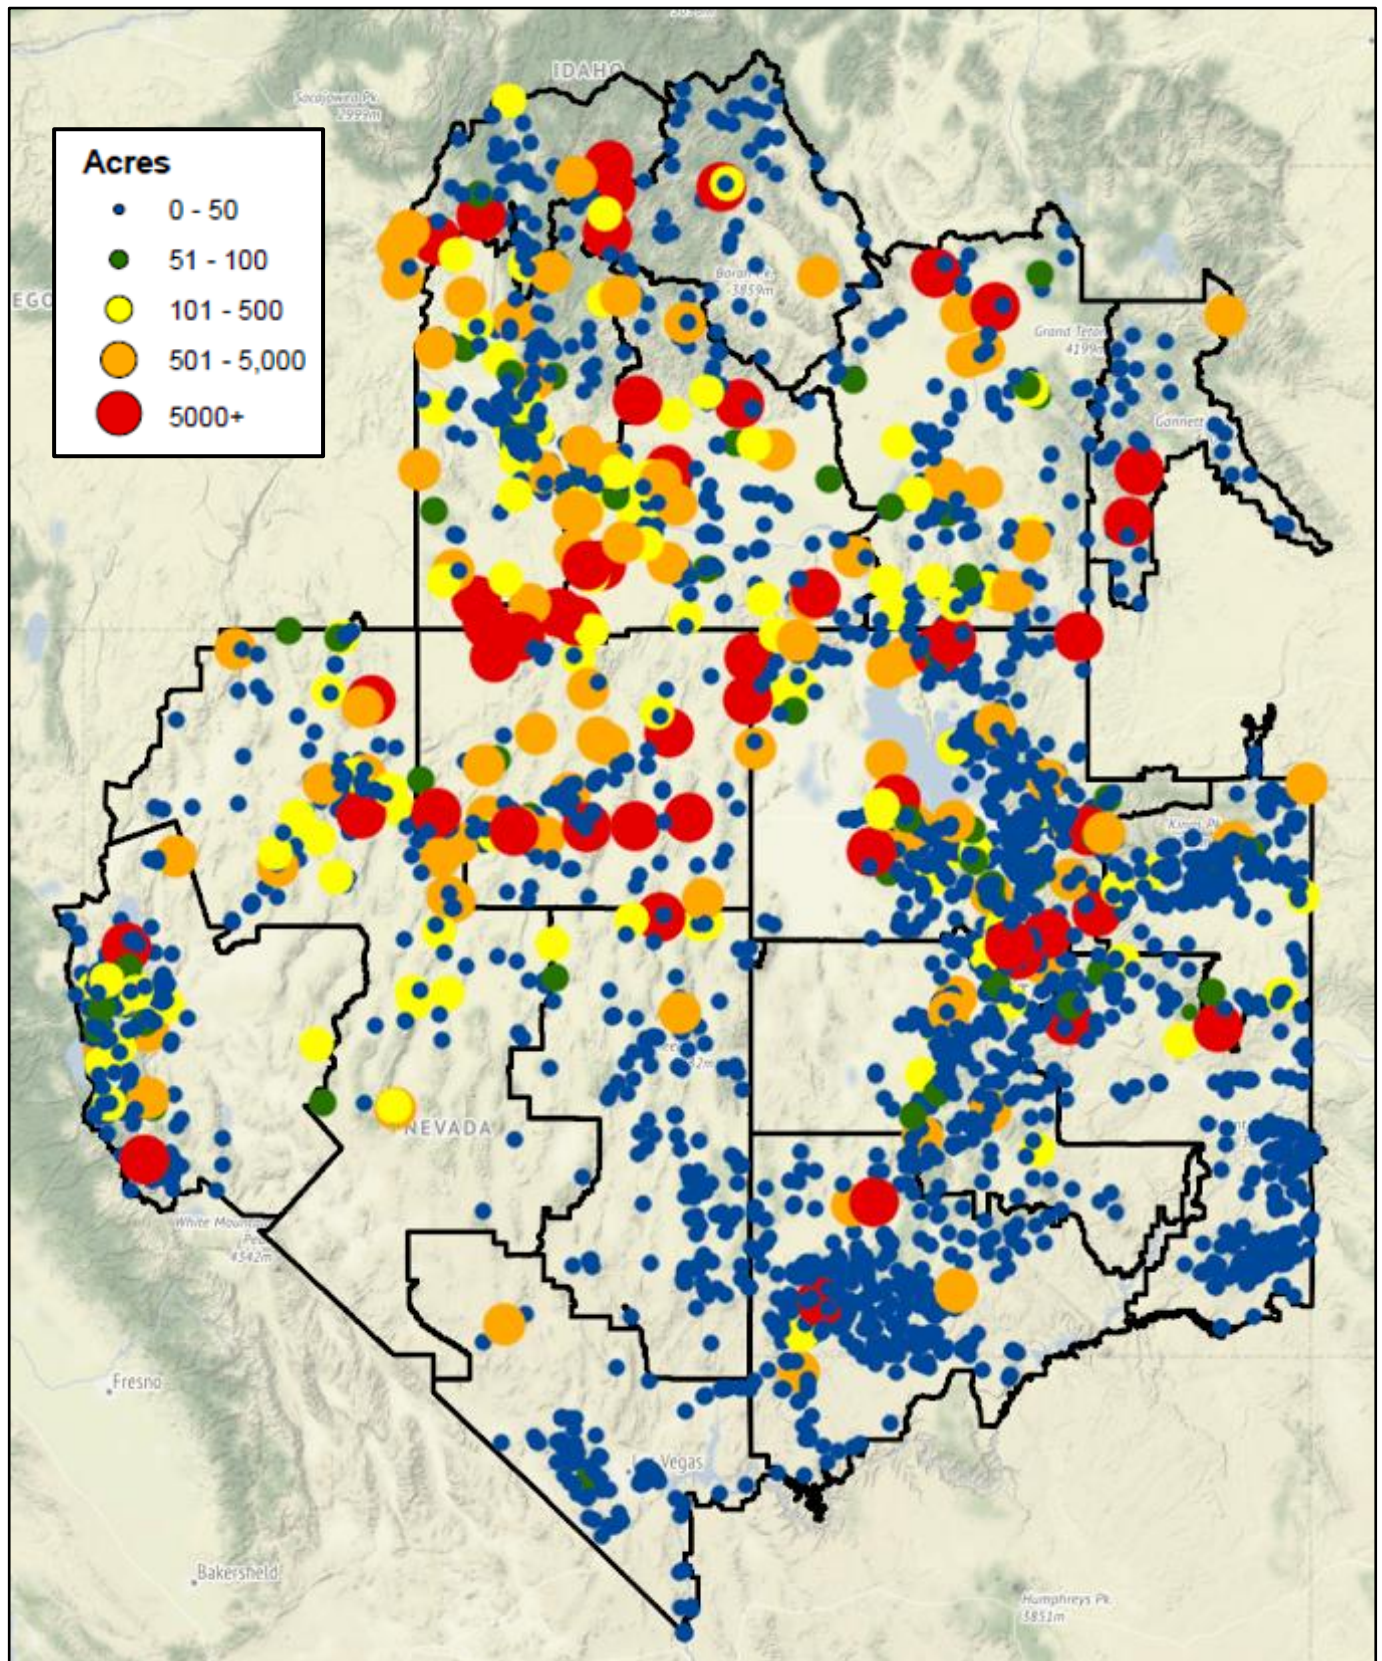

The first large fire of the year was the Jungo incident in Humboldt County Nevada. The Jungo was a 519 acre human caused fire located six miles west of Winnemucca Nevada. The Jungo started on January 24th, two months earlier than the first reported large fire of 2017

The largest fire of the year was the Martin incident. The Bureau of Land Management Winnemucca Field Office fire, whose cause is human, was four miles northeast of Paradise Valley, NV. The fire started on July 5th and was contained/controlled on July 21st at 435,569 acres.

The graph below indicates large fire activity by month. The numbers align with a general pattern for large fire occurrence within the Great Basin. There were a few "late starts" to the typical large fire season during October and November which lasted anywhere from a few days to a few weeks.

Fire Activity Map

Prescribed Fire Review

The following statistics display prescribed fires and acres burned by units as reported on the Daily Situation Report within the FAMWEB Program. Only agencies who reported prescribe fires and acres to the FAMWEB Situation Report Program are represented in the chart below. Compared to 2017, there was one less ignition, but an additional 3,485 acres were accomplished.

Prescribed Acres Completed by State and Agency

*2 prescribed fires for 6 acres in CA-NOD not included.

Marten Creek – September 2018 (WY-BTF)

Incident Management Teams (IMT)

Great Basin MAC Group

The Great Basin Multi-Agency Coordinating Group support organization was activated from July 10th – October 2nd during the 2018 fire season for total of 85 days.

Area Command & National Incident Management Org - NIMO

Great Basin did not host any Area Command or NIMO Teams in 2018.

Type 1 Incident Management Teams

- Type 1 IMT commitment within the Great Basin was 158 days.
 - The Great Basin mobilized both of its Type 1 IMTs within the geographic area to nine incidents for total of 112 days.
 - There were two out of area Type 1 IMTs assigned to the Great Basin on three separate incidents for a total of 46 days.
- Neither of the Great Basin Type 1 IMTs were mobilized to incidents outside of the geographic area.

Type 2 Incident Management Teams

- Type 2 IMT commitment within the Great Basin was 290 days.
 - The Great Basin Type 2 IMTs were mobilized to 21 incidents.
 - 19 within the geographic area, totaling 201 days.
 - 2 outside of the geographic area with one to Northern Rockies and one to Northern California, totaling 32 days.
 - Three out of area Type 2 IMTs were mobilized to four incidents within the Great Basin, totaling 57 days.
 - The initial mobilization for the geographic area was Roide's Team on June 11th to the Trail Mountain fire in Utah. This was six days before the initial mobilization in 2017. The final mobilization for the season was Roide/Bird's Team to the Mirror Lake Complex on September 23rd.

Martin fire – July 2018 (NV-WID)

Equipment Summary for Contract Equipment

Range Two fire, Lamoille Canyon – September 2018 (NV-ECFX)

Overhead Resource Order Summary

This summary includes all overhead positions that were ordered within the geographic area. It also includes out of region orders that were filled with Great Basin resources. *Data was pulled from ROSS/Cognos reports.*
