2019

Great Basin
Fire Activity Report

Great Basin 2019 Fire Activity Report

Table of Contents

Summary Information

The Great Basin Coordination Center (GBCC) is the focal point for coordinating the mobilization of resources for wildland fire, and other incidents throughout the Great Basin Geographic Area. The Great Basin Geographic Area encompasses Utah, Nevada, Idaho (South of the Salmon River), the Western Wyoming Mountains, and the Arizona Strip. GBCC is located in Salt Lake City, UT and provides Intelligence, and Predictive Services related products, for use by the wildland fire community for incident management decision-making.

GBCC Annual Fire Report General Information

GBCC is responsible for compiling fire reports for all *large* wildland fires on lands administered by the following five federal agencies; BLM, BIA, USFS, FWS, NPS, and state agencies. A *large* fire is defined as greater than 100 acres in forest fuel types, and greater than 300 acres in shrub and grass fuel types. Annual figures of total fire starts (regardless of size), and acres burned for individual units are also included.

Statistics used in this report were gathered from the Fire and Aviation Management Web applications (FAMWEB) System (which includes the Situation Report and Incident Status Summary {ICS-209} Programs, and from the Resource Ordering & Status System (ROSS)). The statistics presented here, are intended to provide a geographic area perspective of annual fire activity and may not reflect official figures for a specific agency.

This document, in addition to previous years, is available electronically at the GBCC web page: https://gacc.nifc.gov/gbcc/index.php under the Intelligence link.

Disclaimer: The figures in this report provide general reporting information and overall accuracy cannot be guaranteed. Any determinations, policy, or subsequent reports using this information should be done under consultation with appropriate experts. For agency-specific details or official agency figures, contact the respective agency.

Canyon fire, ID-BOF, July 15, 2019

Weather 2019 – Moist Start / Dry Monsoon

Dought Monitor Late May	Annual Precipitation	July-Aug. "Non-soon"
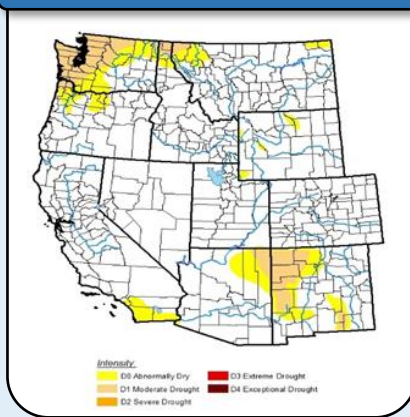

Notable Weather Events

- The 2019 Fire Season was preceded by a very wet winter and near record snowpack across much of the higher terrain, eliminating drought conditions from the previous year.
- Above normal grass-load existed across lower elevations, especially South of the Idaho border. However, cool/moist conditions continued through the Spring, into early June.
- The Southwest Monsoon was completely absent during July, allowing much of Utah, Nevada, and the Arizona Strip, to continue drying through the end of the month (top center chart). Several wind and dry lightning events increased fire activity during this time.
- Despite the drying across Southern areas, live fuel moisture levels remained well above normal thru midsummer. Thus, despite the heavier fine fuel load, spread was limited by the live fuel moisture of the brush component.
- The first significant push of monsoonal moisture did not occur until early August (top right chart). This did temporarily diminish fire activity in Southern areas. Further North, in the Central Idaho Mountains, fuels continued drying to critical levels, with increased fire activity.
- A sudden shift to a prolonged cool/wet pattern across Idaho/Wyoming by the end of August-mid-September essentially ended large fire potential in those Northern areas.
- Southern Nevada/Utah, and the Arizona Strip remained dry, causing a reemergence of fire activity however, longer nights minimized most fire to one burn period by mid-September.
- Fire season gradually ended in the Southern areas by late September, due to light precipitation events, and longer cooler nights.

June 20th 2019 Fuel Conditions: ERC
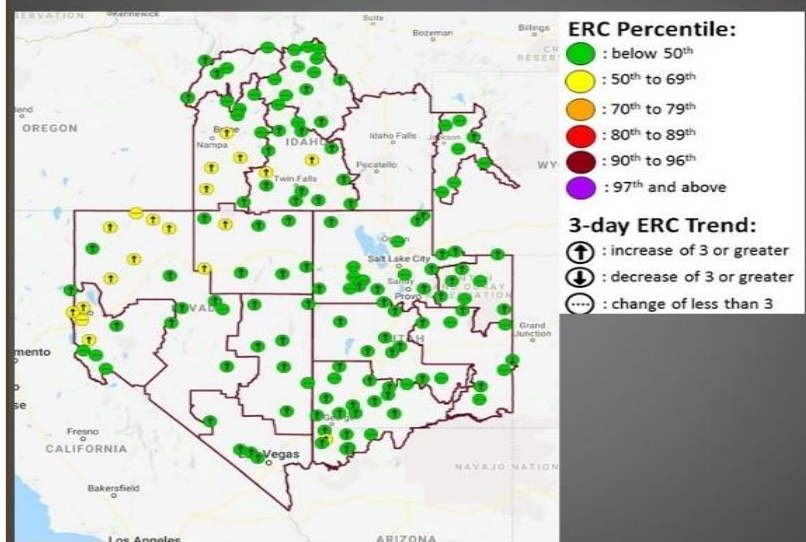

Early Fire Season:
Moist fuel conditions prevailed across all areas. Fine fuel loading was very high in lower elevations but high live fuel moisture greatly limited fire activity in those areas.

Mid-Summer – Southern and Eastern Areas:
A late and weak monsoon increased fire danger across Southern areas, but above normal live fuel moisture limited large fire growth.

July 21st Fuel Conditions: ERC
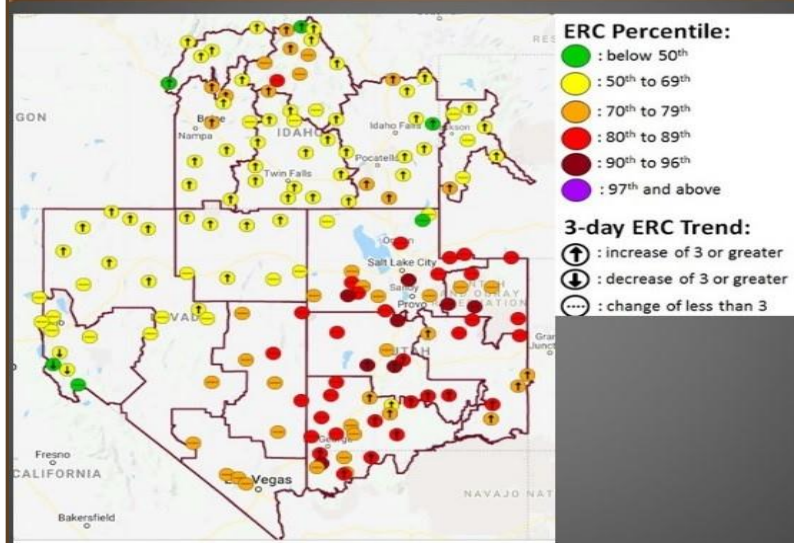

Aug 3rd Current Fuel Conditions: ERC
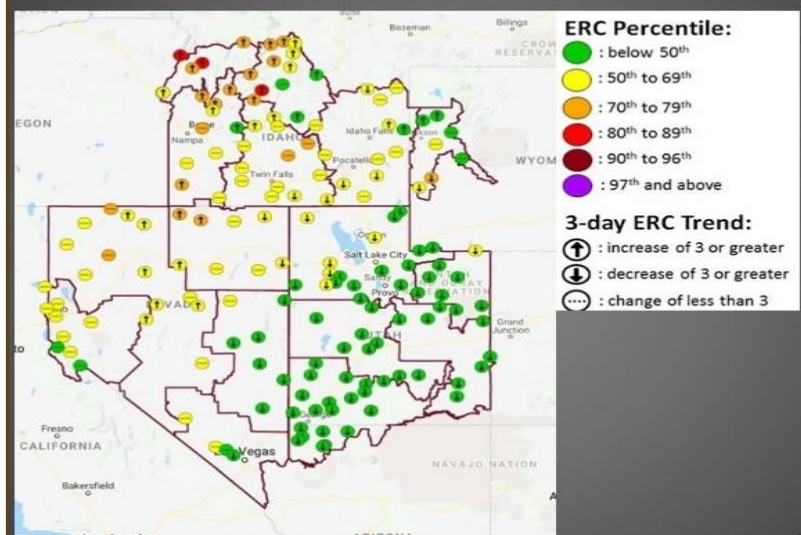

August:
Late monsoonal moisture finally arrived across Southern and Eastern areas. Gradual drying began across Western Idaho. Live fuel moisture was still a limiting factor in many areas until the end of the month.

Fire Summary for the Great Basin

The Great Basin had a below average year for fire occurrence and total acres burned during 2019. There were 2,308 fires reported, burning a combined total acres of 459,386.

Utah	92,380
Nevada	82,283
Arizona	4963
Wyoming	380
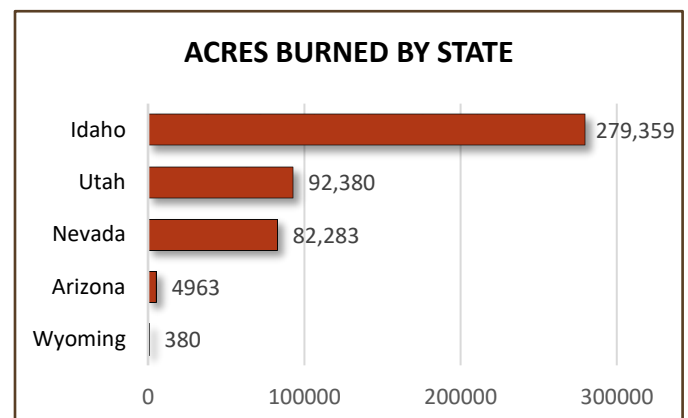

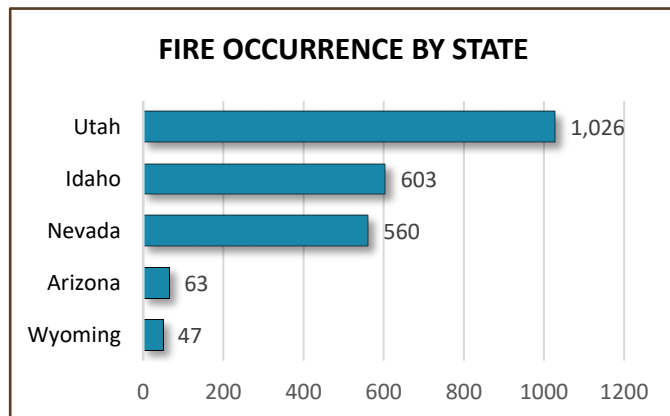

Great Basin Comparison with Historical Averages

The Great Basin experienced 93% of the 5 year average and 77% of the 20 year average, for ignitions. 2019 fell far below the average of acres burned, burning 39% of the 5 and 20 year averages.

Historical Fire Occurance

2019	5 Year Avg.	10 Year Avg.	20 Year Avg.
2,308	2,474	2,598	3,011

Historical Acres Burned

2019	5 Year Avg.	10 Year Avg.	20 Year Avg.
459,386	1,183,640	1,122,762	1,175,647
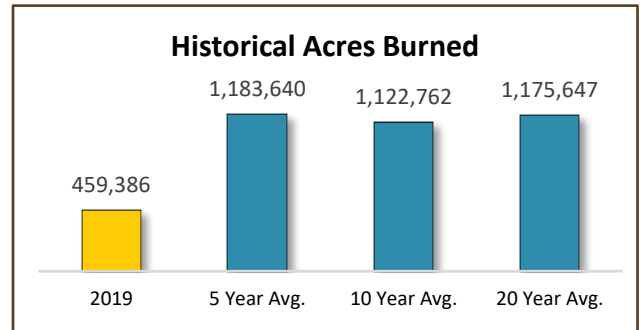

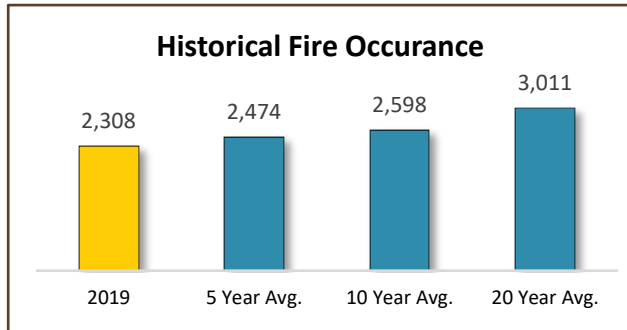

Preparedness Level Review

Great Basin's Preparedness Level was elevated from 1 to 2 on July 7th, one month later than the 2018 season; this timeframe is slightly later than the historical increase from PL 1 to PL 2.

On August 5th, the Great Basin's Preparedness Level increased to PL 3, approximately one month later than 2018. The increase was in conjunction with a short spike in initial attack and resource commitment. The geographic area remained at PL 3 for seven days (until August 12th), when the PL returned to PL 2 where it remained for a few weeks, before returning to PL 1, on September 21st.

National Preparedness level markers are included on the display below to illustrate how the national situation was fairly consistent with the conditions experienced within the Great Basin.

Preparedness Level

Legend: Geographic PL — National PL

Markers: Pot Hole, Flat Top, Bruington & Hot, Corta, Neck
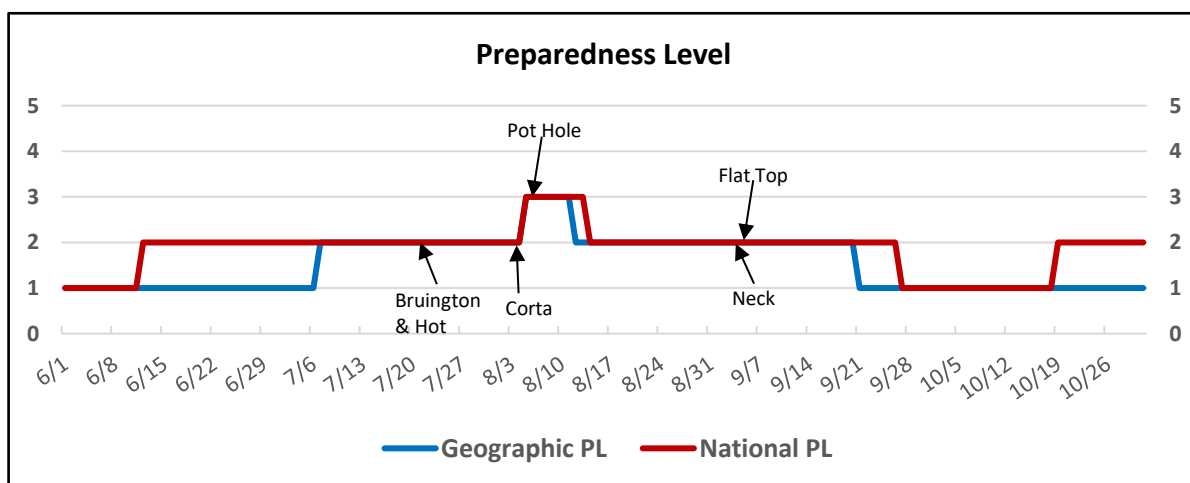

Year End Totals by Cause

Fire statistics for this report were pulled from the SIT Report. The statistics have not been reconciled with 1202s, FIRESTAT, or other final fire reporting systems.   Great Basin reported 2,308 fires for 459,386 acres. 1,387 of those starts were human caused while 921 were natural ignitions. The 15-year average indicates a 13% increase (from 47 – 60%) of the Basins total fires were human caused.

Year	Human Caused		Lightning Caused		Totals

Large Fire Activity Review

Per the National Mobilization Guide, a large fire is a wildland fire managed for complete perimeter control (Full Suppression), that is 100 acres or larger in timber fuel types, and 300 acres or larger in grass or brush fuel types. There are other incidents that require ICS-209s, but the chart below includes only fires that meet the 100+/300+ description, and are sorted by start date of the incident.

Large Fire Occurrence by Month

The first large fire of the year was the "Bender incident" on June 15th, in Owyhee County, ID. The Bender was a 313 acre lightning caused fire, located ten miles northeast of Grassmere, ID.

The largest fire of the year was the "Bruington incident" on July 22nd. The lightning caused Department of Energy, Idaho National Laboratory fire, was located ten miles South of Mud Lake, ID and burned 112,016 acres. It was contained/controlled on July 26th.

The graph below indicates large fire activity by month. The numbers align with a general pattern for large fire occurrence within the Great Basin. There were a few "late starts" to the typical large fire season during October and November, which persisted anywhere from a couple days to a few weeks.

Number of Large Fires by Month

Month	Number
June	8

Incident Management Teams (IMT)

Great Basin MAC Group

The Great Basin Multi-Agency Coordinating (MAC) Group wasn't activated during the 2019 fire season.

Area Command & National Incident Management Organization - NIMO

Great Basin did not activate any Area Command or NIMO Teams in 2019.

Type 1 Incident Management Teams

- Neither of the Great Basin Type 1 IMTs were mobilized within the geographic area.
- Both of the Great Basin Type 1 IMTs were mobilized to incidents outside of the geographic area to two incidents, for total of 40 days.

Res Name: TEAM - IMT - T1 - GB - TEAM 1 - ADELL						
Incident GACC	Incident Disp	Incident Number	Incident Name	Mob ETD	Demob ETA	Days Assigned
AK-ACC	AK-KIDC	AK-KKS-903181	SWAN LAKE	8/19/19	9/13/19	26
					TOTAL	26

Res Name: TEAM - IMT - T1 - GB - TEAM 2 - DEMASTERS						
Incident GACC	Incident Disp	Incident Number	Incident Name	Mob ETD	Demob ETA	Days Assigned
CO-RMC	CO-PBC	CO-RGF-001388	DECKER	10/16/19	10/30/19	14
					TOTAL	14

Type 2 Incident Management Teams

- Great Basin Type 2 IMTs were committed within the Great Basin for total of 53 days on 5 separate incidents.
  - The initial mobilization for the geographic area was Hick's Team (on July 21st) to the Vader fire in Idaho. This was at least six weeks later than the initial mobilization in 2018. The final mobilization for the season was Rohrer's Team, to Meadow Creek, on September 9th.

Resource Order Summary

During 2019, the dispatch community within the Great Basin entered 57,710 requests. Of those 57,710 requests, 612 orders were deleted, 52,186 were filled, which equates to 90% fill rate. The total requests represent a 50% decrease in requests entered into the system compared to those entered in 2018.

Equipment Summary for Contract Equipment

Contract Equipment Assignments

Category	Value
Engines	151
Water Tenders	90
Transportation	58
Dozer	48
Fuel	23
Hand Washing	20
Potable Water	19
Gray Water	18
Refrigeration Truck	13
Trailer	12
Service Truck	12
Excavator	8
Weed Washers	8
Masticator	7
Clerical Support	6
Chipper	4
Skidders	1
Fell Buncher	1
Mobile Food Service	1
Road Grader	1
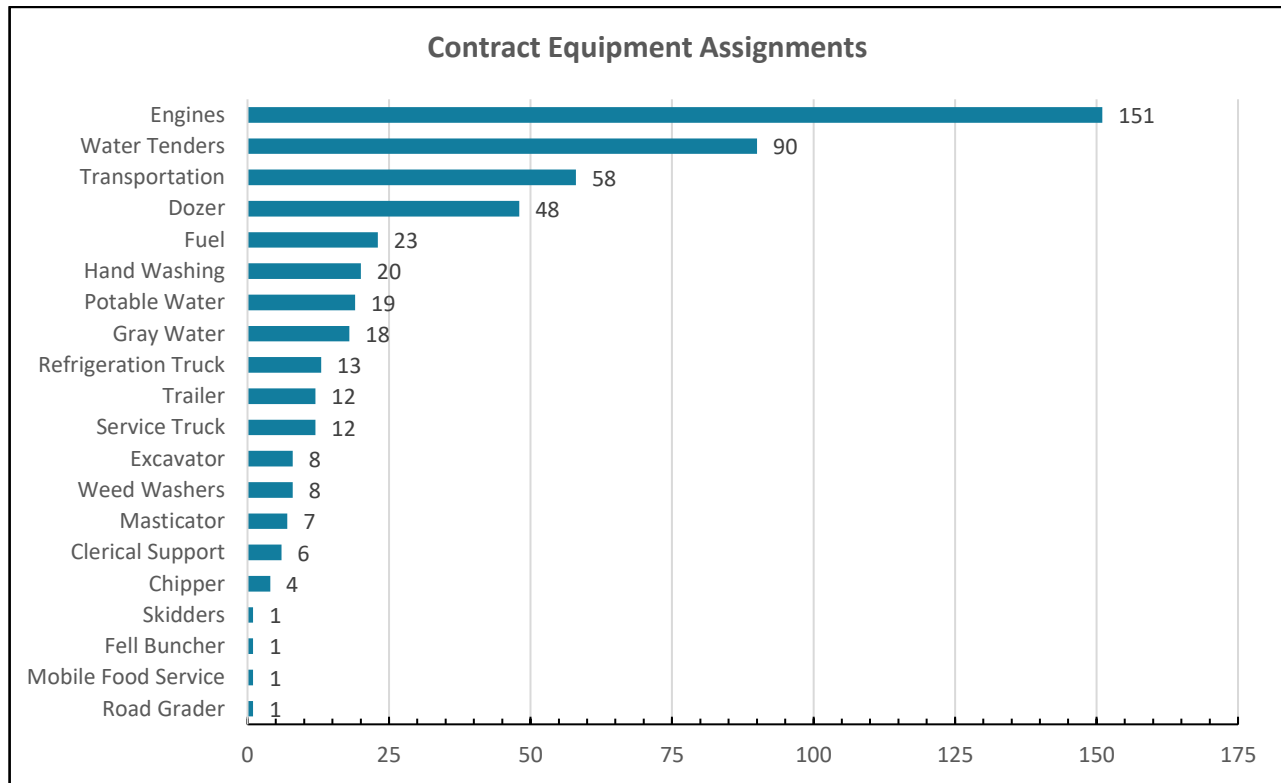

Overhead Resource Order Summary

This summary includes all overhead positions that were ordered within the geographic area. It also includes out of region orders that were filled with Great Basin resources. *Data was pulled from ROSS/Cognos reports.*
