Connecting and Preserving Tahoe

On Lake Tahoe's northeast shore, NDOT and partners constructed a three-mile multi-use path along SR-28 from Incline Village to Sand Harbor to enhance lake access while addressing environmental concerns such as erosion impacts on the lake's pristine waters. Critical safety and environmental improvements were also made to SR-28. Ultimately, the shared-use path will line the perimeter of Lake Tahoe, connecting communities, beaches, and parks.

In addition to five awards previously garnered, the project was more recently named a Tahoe Regional Planning Agency "Best in the Basin" award winner for environmental stewardship within the Lake Tahoe Basin.

Intelligent Innovation Reduces Congestion

The Department's Transportation System Management and Operations program Investment Prioritization Tool was awarded the National Operations Center of Excellence (NOCOe), Project Selection and Prioritization's Runner-Up prize at the 2021 Transportation Systems Management and Operations (TSMO) Awards Competition. This national contest represents the latest TSMO projects and programs that increase the efficiency of America's infrastructure. The innovations recognized also address air quality and improve the safety and mobility of the traveling public.

NDOT's TSMO program has become an important component of traffic operations. The program is aimed at reducing congestion, including by deploying Intelligent Transportation System infrastructure. Systems like these and higher standards of signal system management and coordination have played a critical role in maintaining and enhancing reliability of our state transportation system. The TSMO Program proactively addresses transportation challenges (such as recurring and/or non-recurring congestion, safety, mobility, and reliability) via performance-driven strategies. These strategies focus on managing and operating the system more efficiently to optimize the existing infrastructure, increasing safety, and mobility for users.

NDOT Biologist Instrumental in Connecting and Preserving Nevada Wildlife

NDOT biological supervisor Nova Simpson received the International Conference on Ecology and Transportation 2021 Leadership (Catalyst) Award. As the foremost interdisciplinary, interagency conference addressing the broad range of ecological issues related to transportation, ICOET recognized Nova's accomplishments in promoting transportation and wildlife safety and mobility. One highlight includes a regional approach to improving traffic safety and habitat connectivity with nine wildlife crossings installed on I-80 and U.S. 93 in northeastern Nevada to reduce potentially dangerous vehicle-animal collisions.

Highway Safety Statistics

Year	Annual Crashes
2020	43,683
2019	56,384
2018	41,422
2017	52,588
2016	54,021

0.5% of Nevada’s crashes resulted in a **fatality**

41.6% of Nevada’s crashes resulted in an **injury**

Property Damage Only Crashes	23,314
Injury Crashes	20,076
Fatal Crashes	293
Total Crashes	43,683
Fatalities	317
Injuries	27,586

Note: Crash data for the time period from January 1, 2020 – December 31, 2020.

FATAL CRASHES BY MONTH

INJURY AND PDO CRASHES BY MONTH

CRASHES BY DAY OF THE WEEK

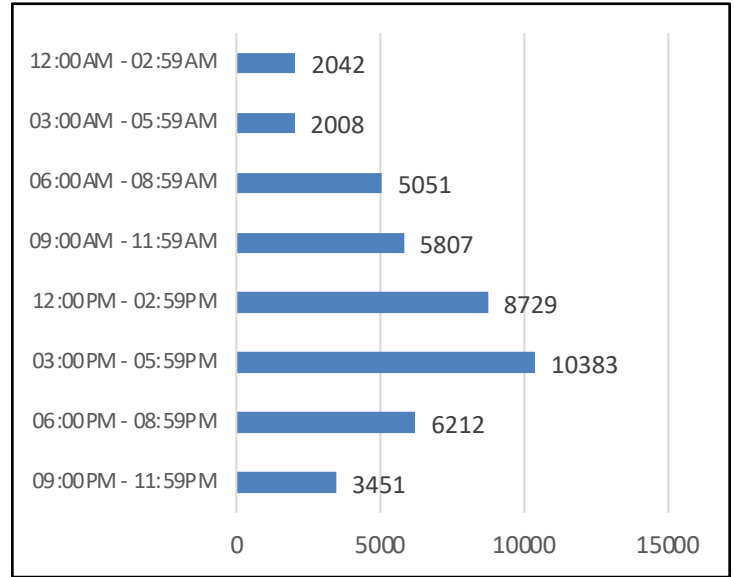

In 2020, the largest number of crashes occurred between the hours of 3:00 PM and 6:00 PM. Thursday, and Friday saw the highest percentage of most crashes, comprising 32% of total crashes. January saw the highest amount of crashes in 2020 with 4,339; April the least with 2,065. Intersection information is not available, and is not included.

CRASHES BY LIGHTING CONDITIONS

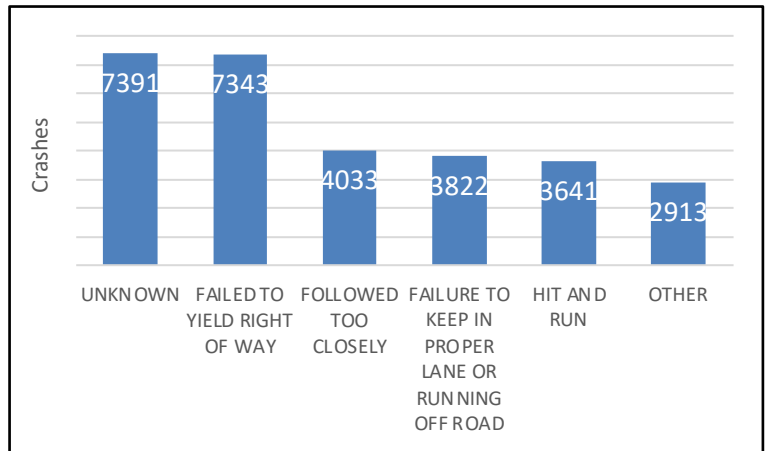

CRASH HOUR RANGE

2% of crashes involved a Motorcycle.

14% of crashes involved a Lane Departure.

TOP CONTRIBUTING FACTORS

Performance Management Plan & Performance Measures

NDOT uses 16 performance measures to link projects to the core vision, mission, and goals of the Department to ensure investment accountability and deliver high-quality performance-based projects. The Department has established ultimate and annual targets for each performance measure, except for the greenhouse gas emissions reduction measure baseline that is still being determined. For a complete look at Department performance measures, go to <http://www.nevadadot.com/documents>, and then click on "Annual Performance Management Report". The following are the performance measures organized by major areas:

Performance Management Plan & Performance Measures

Performance Measure		Target	Current Status	Target Met	Trend (5yrs or less)	Desired Trend
Employee						
Reduce Work Place Accidents (1)	Injuries/Illnesses per 100 employees	2% Annual reduction	0.4% Reduction			
	Injuries/Illnesses requiring medical attention per 100 employees	2% Annual reduction	0.4% Reduction			
Provide Employee Training (2)	Percentage employees trained according to requirements	85% Compliance annually	Average 80% compliance			
Improve Employee Satisfaction (3)	Percentage employees satisfied with NDOT	61% Annually	61% Satisfied			
Project Delivery						
Streamline Agreement Process (4)	Percentage agreements processed within 20 days	90% Annually	94% Processed within 20 days			
Streamline Project Delivery – Bid Opening to Construction Completion (7)	Percentage projects completed on schedule and within budget	80% Annually	93% within budget			
			98% within schedule			
			69% Change order <3% cost increase			
Streamline Project Delivery – Schedule and Estimate for Bid Advertisement (13)	Percentage of scheduled projects advertised within the reporting year	80% Advertised within the reporting year	73.0%			
	Percentage of advertised & awarded projects within established construction cost estimate range	80% Delivered within established cost estimate range	39% (Int. vs Award)			
43% (Final vs Award)						
Streamline Permitting Process (15)	Percentage encroachment permits processed within 45 days	95% Annual	96.6% Processed within 45 days			
Assets						
Maintain State Highway Pavement (8)	State roadways maintained at "fair or better" condition (Road category definition in report)	Category 1: 95%	96.4%			
		Category 2: 90%	88.3%			
		Category 3: 85%	93.0%			
		Category 4: 75%	72.1%			
		Category 5: 50%	45.0%			
Maintain NDOT Fleet (9)	Percentage mobile equipment in need of replacement	1% Annual decrease	0.45% Decrease			
	Percentage fleet in compliance with condition criteria	1% Annual increase	3.15% Increase			
Maintain NDOT Facilities (10)	Percentage completion of facilities assessments & priority work	0.670	0.731			
Maintain State Bridges (14)	Percentage bridges on the NHS in good condition	35% or greater	46.2%			
	Percentage bridges on the NHS in poor condition	7% or less	0.90%			
	Percentage bridges on the Non-NHS in good condition	35% or greater	48.2%			
	Percentage bridges on the Non-NHS in poor condition	7% or less	2.0%			

Performance Management Plan & Performance Measures

Performance Measure		Target	Current Status	Target Met	Trend (5yrs or less)	Desired Trend
Safety						
Emergency Management, Security and Continuity of Operations (11)	Percentage of emergency management plans implemented	100% Annually	100% Compliance			
Reduce Fatal & Serious Injury Crashes (12)	Number of traffic fatalities	Reduction in the # of traffic fatalities compared to the trend value of 330.6	318.0			
	Number of serious traffic injuries	Reduction in the # of serious injuries compared to the trend value of 1088.6	1,060.8			
	Number of traffic fatalities per 100M VMT	Reduction in the rate of fatalities per 100M VMT compared to the trend value of 1.214	1.181			
	Number of serious traffic injuries per 100M VMT	Reduction in the rate of serious injuries per 100M VMT compared to the trend value of 4.060	3.930			
	Number of non-motorized fatalities and serious injuries	Reduction in the # of non-motorized fatalities & serious injuries compared to the trend value of 294.7	283.0			
	Our Partners					
Improve Customer and Public Outreach (5)	Customer satisfaction & public outreach	75% Positive satisfaction level (Annual customer satisfaction survey)	75%			
Improve travel reliability and reduce delay on the State Roadway System (6)	Percent of person-miles traveled on Nevada interstate that are reliable	86.9% or higher	94.4%			
	Percent of person-miles traveled on Nevada non-interstate NHS that are reliable	70.0% or higher	92.4%			
	Annual hours of peak-hour excessive delay per capita (Urbanized Areas)	12 hrs or less	4.60 hrs			
	Percent of non-single occupancy vehicle travel in Nevada urbanized areas	21.5% or higher	21.5%			
	Freight trip reliability Index	1.28 or less	1.23			
Reduce Greenhouse Gas (GHG) Emissions (16)	Percent reduction in greenhouse gas emissions	In alignment with state's goal (2005 baseline), 28% reduction by 2025 and 45% reduction by 2030	NDOT baseline is being evaluated.	N/A		

Regionally Significant Projects (Las Vegas)

US-95 Northwest Centennial Bowl, Phase 3C:

This phase of the project includes the construction of the US-95 North to CC-215 West (the second-longest bridge in the state), US-95 South to CC-215 East, and CC-215 East to US-95 South ramps for the CC-215/US-95 system-to-system interchange. The total cost of this phase of the project was \$73 Million. Construction began in January 2019 and is expected to be completed in 2022.

US-95 Northwest Centennial Bowl, Phase 3D:

This phase of the project will complete the CC-215/US-95 system-to-system interchange and upgrade CC-215 to a six-lane freeway through the area. Construction includes a multi-use trail and widening of Lone Mountain Drive Road over US-95, for a total estimated construction cost of \$163 Million. Construction began in early 2021. The anticipated substantial completion is mid-2024.

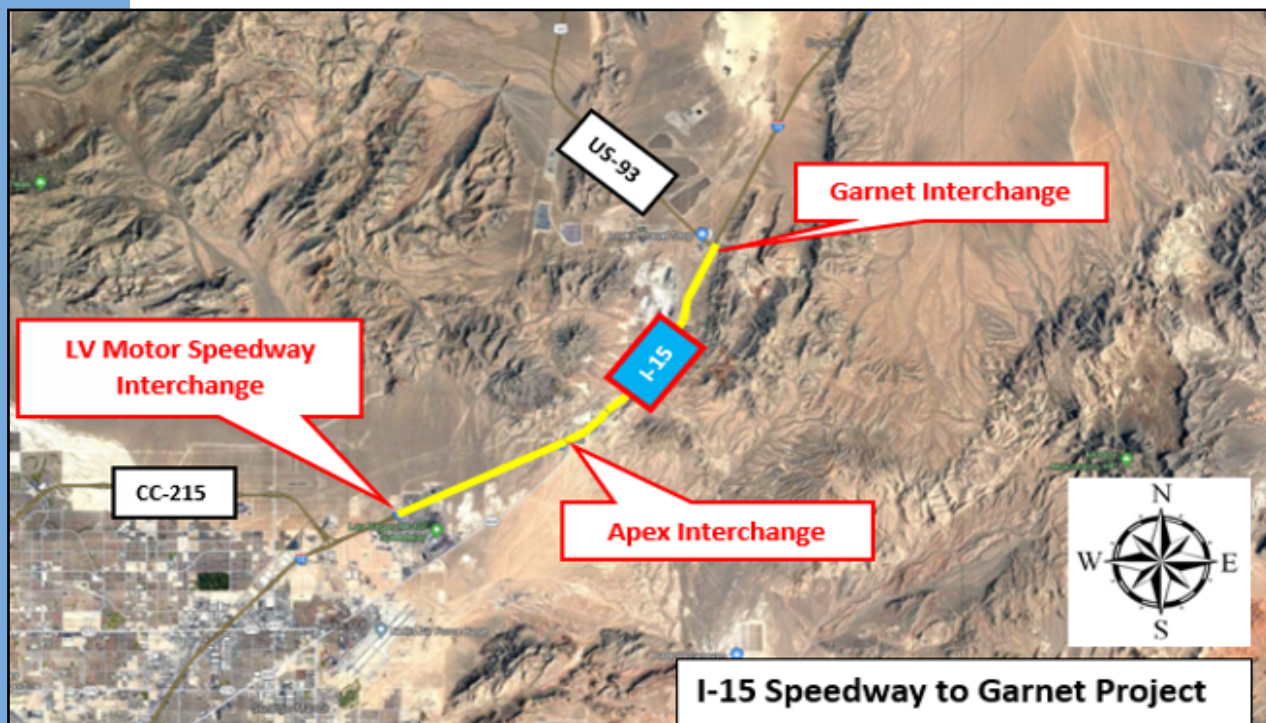

Regionally Significant Projects (Las Vegas)

I-15 North Phase 3 (I-15 Speedway to Garnet Project):

This work consists of two segments of improvements that will provide a connecting link between the improvements at the Garnet Interchange (US-93) and I-15 N Phase 4 (I-15/CC-215 Northern Beltway Interchange). The first segment is along the I-15 corridor from Speedway Boulevard to Apex Interchange (Las Vegas Boulevard). This segment will complete all the improvements identified in the Environmental Assessment (EA) for I-15 improvements, US-95 to Apex. An update to the EA for the additional improvements in this segment is anticipated to be completed in third quarter of 2021. The improvements include adding one through lane in each direction, truck parking at Apex Interchange, turn lanes on Las Vegas Boulevard between the interchange and Clark Petersen Boulevard, drainage and landscape/aesthetic enhancements. The current construction cost estimate for this segment is \$37 Million.

The second segment is along the I-15 corridor from Apex to Garnet Interchange. This segment will add one through-lane in each direction, truck parking off northbound I-15, the extension of the intelligent transportation system up to Garnet and drainage and landscape/aesthetic enhancements. The environmental document for this segment is currently being developed and was anticipated to be completed in the third quarter of 2021. The current construction cost estimate for this segment is \$54.3 Million. The design of the above-mentioned improvements for both segments is proceeding. It is anticipated that all these improvements will be advertised together as two separate construction projects simultaneously in the fourth quarter of 2022. Segment 2 will also include a new weigh station in the southbound direction. The design for this facility is not planned to begin sooner than 2024.

Regionally Significant Projects (Las Vegas)

I-15 North Phase 4 (I-15/CC-215 Northern Beltway Interchange):

This project in North Las Vegas includes new ramps, flyovers, and street connections to complete a system-to-system interchange where the northern I-15 meets the Clark County 215 Las Vegas Beltway. The project will also construct I-15 southbound ramps for the Tropical Parkway interchange.

The construction started in the second quarter of 2020 and it is anticipated to be completed in the fourth quarter of 2022. The anticipated cost to construct is \$118 Million.

Regionally Significant Projects (Las Vegas)

Tropicana Interchange Reconstruction and Harmon Avenue HOV Ramps:

This project includes the reconstruction of the Tropicana interchange at I-15/ Tropicana Avenue and the construction of HOV ramps at Harmon Avenue. The estimated cost is \$412 Million, which includes a \$50 Million INFRA grant awarded by FHWA (the Federal Highway Administration). The Department is currently in the Design-Build procurement process and construction is scheduled to begin in 2022.

View looking north of the Tropicana Interchange improvements.

View of the Harmon HOV ramps connecting from I-15 to the south side of the existing Harmon Avenue overpass.

Regionally Significant Projects (Las Vegas)

I-15 South Phase 2 Sloan to Warm Springs Road:

The project includes widening of I-15 South to accommodate an additional general-purpose lane from Sloan to the Blue Diamond interchange, adding auxiliary lanes, and extending the HOV Lanes to St. Rose interchange. The project will also include resurfacing, signing and ITS facilities, ADA improvements, shoulder widening, sound walls, and landscape and aesthetics features, for an estimated construction cost of \$45 Million. Construction is programmed to begin in 2023 and expected to be completed in 2024.

Regionally Significant Projects (Las Vegas)

I-515 SB Auxiliary Lane & Viaduct Rehabilitation Combined Project:

The project includes extending three lanes southbound on I-515 through the Spaghetti Bowl, providing a two-lane entrance ramp from I-15, and striping an additional auxiliary lane southbound from I-15 to Eastern Avenue.

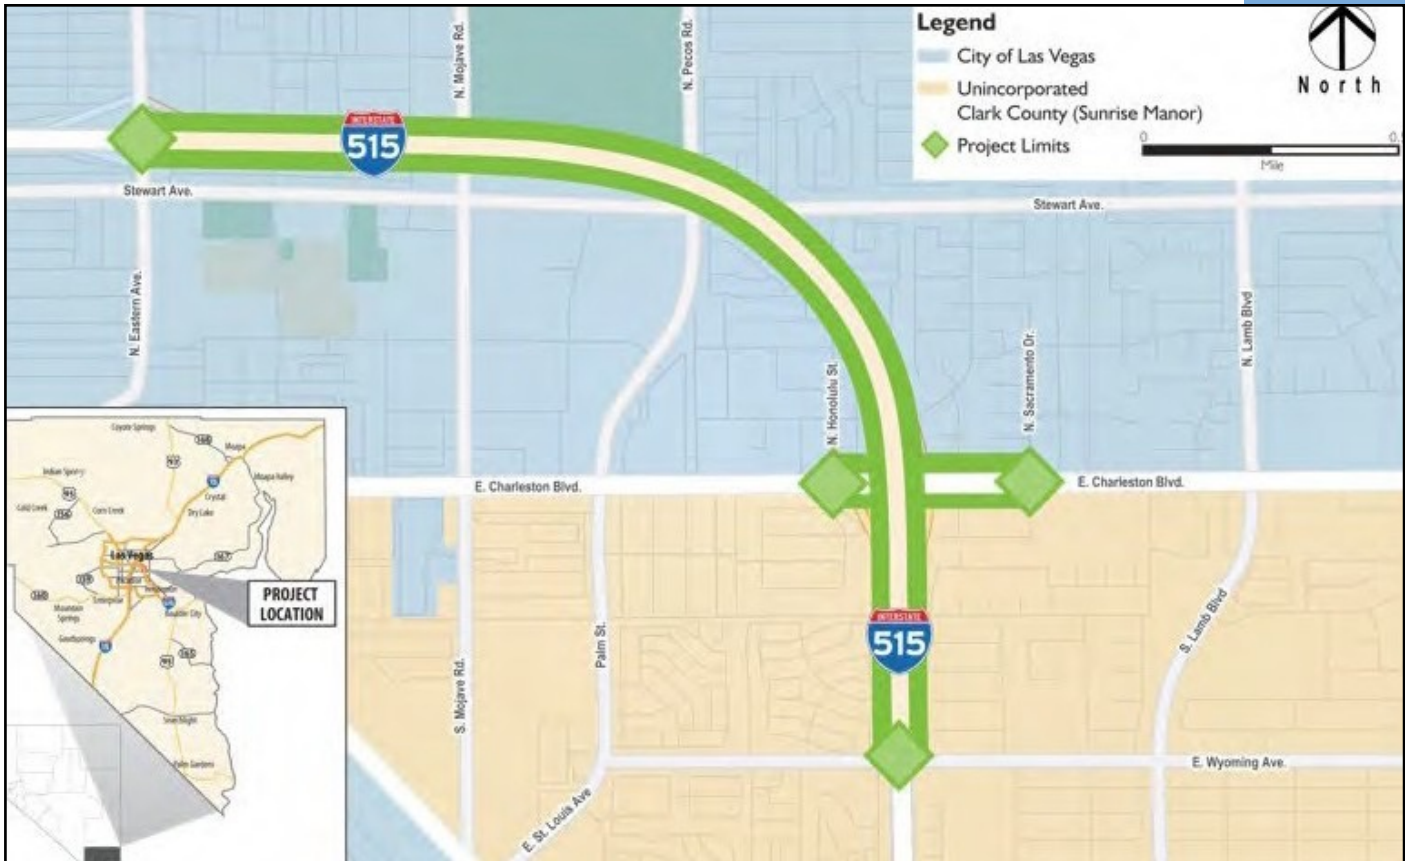

The southbound auxiliary lane will be constructed as a combined project with the downtown viaduct deck and seismic rehabilitation work and I-515 bridge replacements at Eastern Avenue and Desert Inn Road, for an estimated construction cost of \$45 Million. Construction began in 2021 and is expected to be completed in 2022.

Regionally Significant Projects (Las Vegas)

I-515 Charleston Interchange CMAR Project:

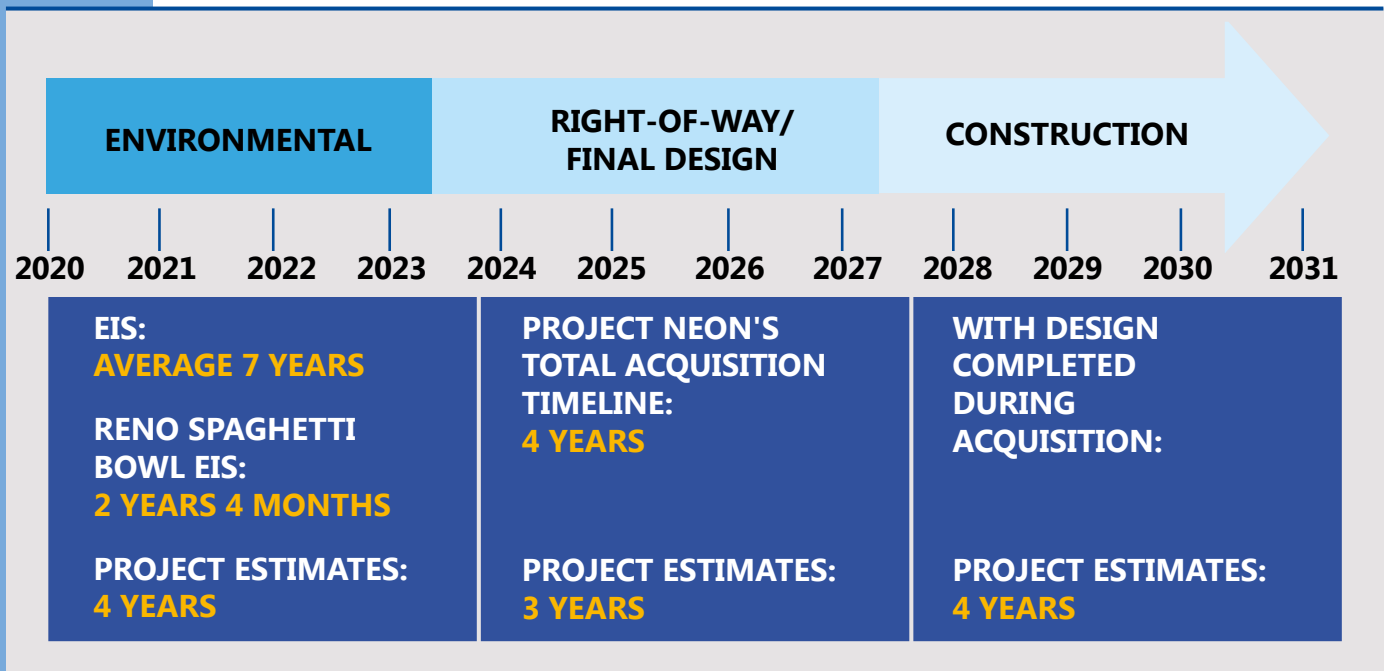

This project includes the reconstruction and improvement of the existing tight diamond interchange at Charleston Boulevard and the addition of auxiliary lanes on I-515 in each direction between Charleston Boulevard and Eastern Avenue. The estimate for this work is \$60 Million. Construction is programmed to begin in the summer of 2022 and expected to complete in spring of 2024.

Regionally Significant Projects (Las Vegas)

Downtown Access Project:

The Downtown Access Project is being pursued to replace aging bridge infrastructure, improve safety, reduce congestion between on/off ramps, add freeway capacity and HOV access to downtown Las Vegas, and meet the community's needs on this corridor. The proposed improvements include adding braided ramps between I-15 and I-515, adding freeway capacity, extending the US95 HOV lanes to Eastern Avenue, and adding HOV interchanges at City Parkway and Maryland Parkway. The project is estimated to be 10-13 years in total. NDOT is starting the necessary environmental studies to begin the project. The following tasks will be pursued: Environmental studies (3-4 years), right-of-way acquisitions (3-4 years), and construction (4-5 years).

Regionally Significant Projects (Henderson)

Henderson Interchange

The project includes the design of a new interchange at I-515/I-11/I-215/Lake Mead Parkway in Henderson. The NEPA study began in 2020 and design is scheduled to follow in 2022. Construction is expected to begin in 2024 with a second phase of construction if needed, beginning in 2028.

Regionally Significant Projects (RTCSNV/FAST)

Advanced Transportation and Congestion Management Technologies Deployment

This Integrated Safety Technology Corridor (ISTC) will deploy, evaluate, and refine the use of emerging technologies and data analytics, including the deployment of various sensors and devices, communications networks, analytical tools, and related technologies. The technology deployment will focus on Active Traffic Management (ATM), Wrong-Way Driver (WWD) System, Strategic Traffic Management Sites (STMS), High-Occupancy Vehicle (HOV) Occupancy Detection System, and all supporting Intelligent Transportation System (ITS) infrastructure and equipment. The project is being funded through a \$6 Million grant issued by the United States Department of Transportation to the Regional Transportation Commission (RTC) of Southern Nevada in partnership with the Nevada Department of Transportation, Nevada State Police, University of Nevada Las Vegas, and Waycare for deployment of Integrated Corridor Management strategies in a critical corridor along US-95 between Summerlin Parkway and the US-95/ Interstate 15 Spaghetti Bowl Interchange. RTC of Southern Nevada has partnered with the department for project delivery. This \$15 Million project will begin late this year and the full deployment will be completed by 2025.

Regionally Significant Projects (Reno)

US 395 North Valleys (Phase 1A, 1B, and 2)

US 395 is the major connection between Reno/Sparks and the north valleys (Golden Valley, Lemmon Valley, and Cold Springs). The route also serves as the main connection to northeast California. This project will widen the roadway, upgrade the structures, and add safety and operational improvements in three phases:

US 395 North Valleys, Phase 1B:

The project phase includes four miles of freeway capacity and bridge widenings from Clear Acre/N. McCarran Boulevard to Golden Valley Road. This phase will include a third southbound travel lane, the addition of an auxiliary lane between interchanges in both the northbound and southbound directions, ramp braiding at Virginia Street loop ramp, and roadway rehabilitation. Estimated construction cost is \$96 Million. Construction is anticipated to begin 2023.

US 395 North Valleys, Phase 2:

This project phase includes more than two miles of freeway capacity improvements from Golden Valley Road to Stead Boulevard. This phase will include continuing a third southbound travel lane, auxiliary lanes between interchanges in both the northbound and southbound directions, and roadway rehabilitation from Golden Valley Road to Lemmon Drive, and adding an additional travel lane in both the southbound and northbound directions from Lemmon Drive to Stead Boulevard. Construction is currently programmed to begin 2026.

Regionally Significant Projects (Reno)

Reno Spaghetti Bowl Project (RSB)

The freeway-to-freeway interchange that connects I-80, I-580, and US-395 is known as the Spaghetti Bowl. The project is referred to as the Spaghetti Bowl reconstruction and includes the Spaghetti Bowl, each of the four legs of the freeway-to-freeway system, and 16 service interchanges that connects the freeway to local roads. The Reno Spaghetti Bowl Project limits are I-80 between Keystone Avenue on the west and McCarran Boulevard on the east, a distance of approximately 5 miles and I-580/US-395 between Meadowood Mall Way on the south and North McCarran Boulevard on the north, a distance of approximately 7 miles. The project is to reconstruct the freeway and bridges, reconstruct and modify interchange access to improve safety and traffic flow, and reconstruct local streets affected by the freeway reconstruction. Improvements will increase highway capacity, traffic operations; expanding the existing highway infrastructure to be compatible with future long-term corridor needs; improving the conditions to the existing highway infrastructure; and enhancing highway safety features to help reduce crash frequency and severity. The project will be constructed in five phases with the first phase of RSB anticipated to be complete in 2022-2023.

Spaghetti Bowl Xpress (SBX)

Improvement of a 2-mile segment of I-580/US-395 from just north of the I-80/I-580 system interchange to Villanova Drive. Improvements will include increased lanes on the I-80 eastbound to I-580 Southbound Spaghetti Bowl Ramp, improved traffic operations, and improved safety; expanding the existing highway infrastructure to be compatible with future long-term corridor needs; improving the conditions to the existing highway infrastructure; and enhancing highway safety features to help reduce crash frequency and severity. SBX also improves southbound operations at two interchanges by reconfiguring the Second/Glendale interchange and adding a braided ramp at Mill Street, as well as replacing failing concrete pavement in both the north and southbound directions on I-580. The Department awarded a design-build contract in an amount of approximately \$181 Million in December of 2019. Construction of these improvements began in the summer of 2020.

Regionally Significant Projects (Ely)

Ely Downtown Reconstruction CMAR:

Reconstruction of US 93 on East Aultman Street and US 50/US 93 Great Basin Boulevard is ongoing. The project will include a new drainage outfall facility, sewer and water, and continuous street lighting. This project was awarded to Q&D Construction for \$26.5 Million, and construction began in July 2020.

Department Personnel

It takes dedication and expertise to administer, construct, and maintain a road and bridge system that has continually been named one of the nation's best. Whether in administration, construction, or maintenance, NDOT's dedicated, expert employees are the driving force behind Nevada's top transportation system.

Rapid population growth of past years and spikes in commodity movement have greatly increased traffic on Nevada highways. With staff overseeing ever-increasing transportation needs and more complex projects and programs, NDOT looks to innovation, partnership, and increasing efficiency to successfully fulfill Nevada's transportation needs.

From maintenance, road preservation, snow removal and safety enhancements to targeted projects, technologies, and programs, department employee workloads and numbers continue to be balanced by improved technologies, streamlined processes, partnerships, and hard-working staff.

Administration:

Office of The Director, Public Information, Internal Civil Rights, Performance Analysis, Audit Services, Multimedia, Financial Management, Flight Operations, Accounting, Information Technology, Administrative Services, Reproduction & Graphic Arts, Buildings & Grounds, Records Management, Human Resources, Training, Industrial Safety, Stormwater Training, Stormwater Administration, Stormwater Inspection, Rotating Engineers, Permits, Road Operation Centers, and Headquarters Stockroom.

Pre-Construction:

Specifications, Design, Structures, Environmental Services, Project Management, Traffic Operations, Location, Right of Way Divisions, Planning Divisions, Research, Program Development, and Roadway Systems.

Construction:

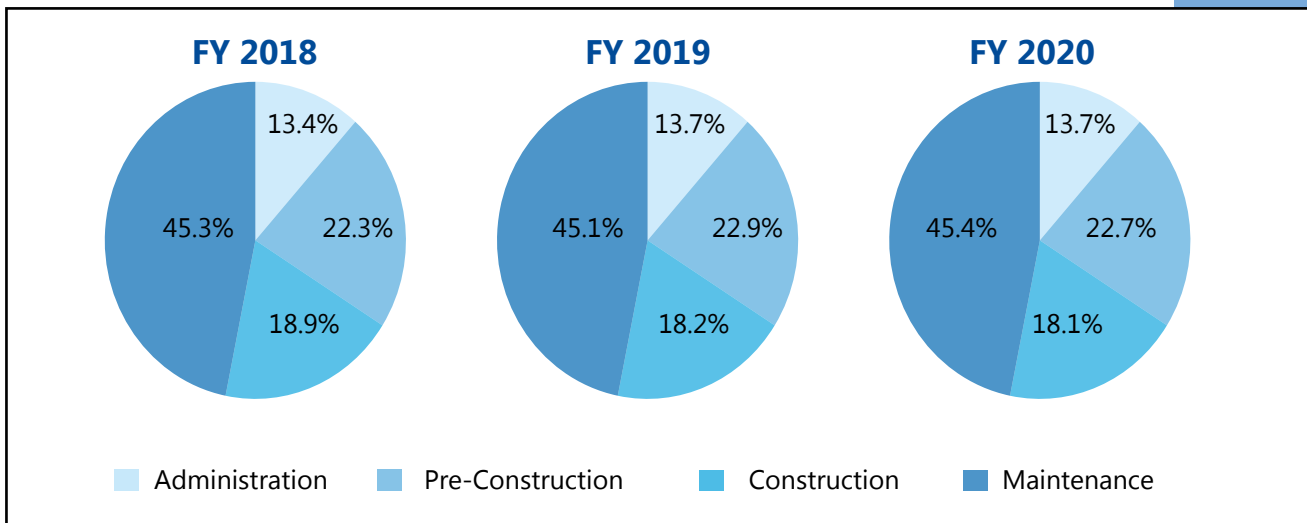

Materials Divisions & Labs, Construction Administration, External Civil Rights, Architecture, and Construction Crews.

Maintenance:

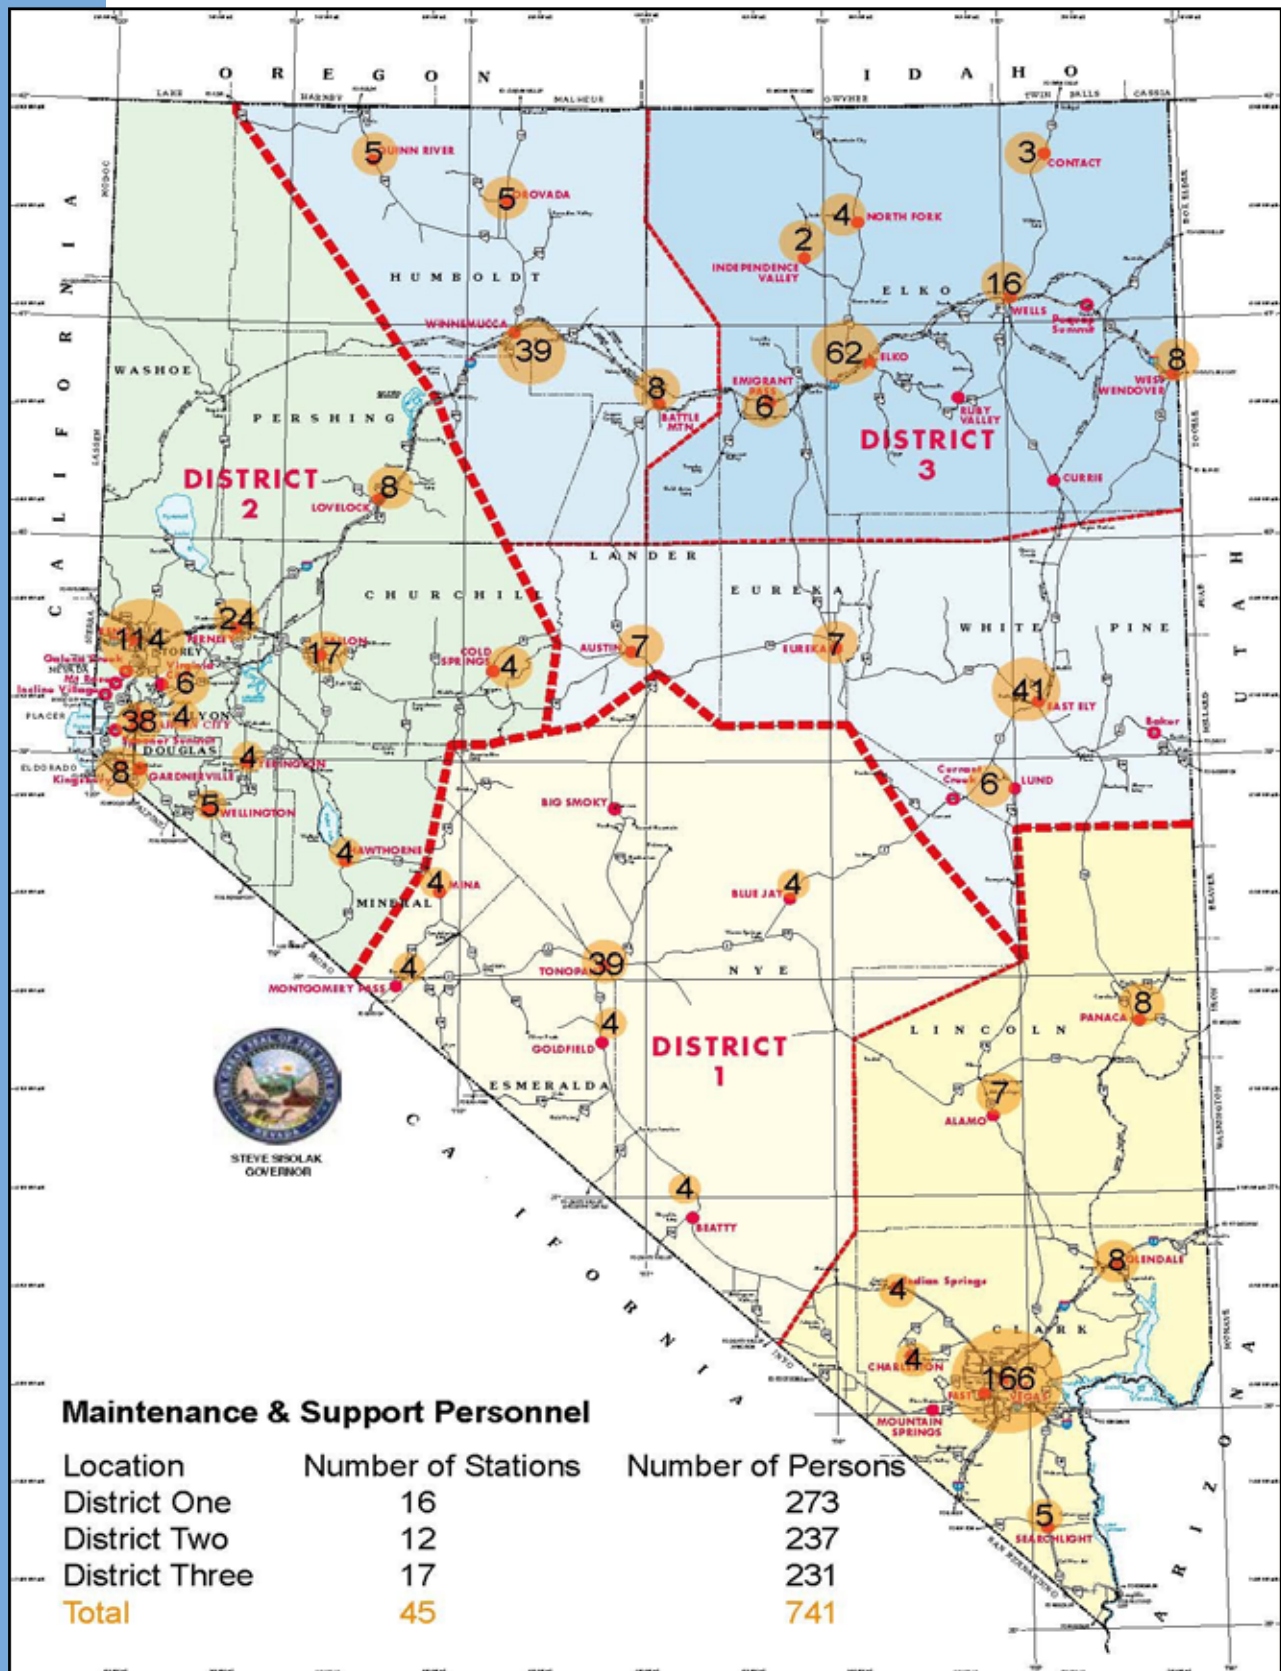

Maintenance & Asset Management, Communications, District Administration, Maintenance Crews, Stormwater Maintenance, and Equipment Divisions.

The numbers of employees in each function are as follows:

216 Administration	358 Pre-Construction	285 Construction	716 Maintenance	1575 Total
------------------------------	--------------------------------	----------------------------	---------------------------	----------------------

Maintenance Stations and Personnel

Note: Number of Personnel includes of the following; District Administration, Communications, Equipment Shops, Stockroom, Dispatch and all of the Maintenance Crew Personnel.

Freeway Service Patrol

The Freeway Service Patrol (FSP) program operates in the Las Vegas and Reno metropolitan areas to mitigate traffic congestion in the heavily traveled sections of our freeways by providing quick and safe incident clearance of mitigations such as: crashes, disabled and abandoned vehicles, debris, lost or sick motorists, pedestrians, animals, scene safety, and other situations that disrupt traffic flow such as fires and hazardous spills. The NDOT FSP program is unique because each patrol vehicle is equipped with a fleet management system that leverages machine learning technology to predict where incidents are likely to occur based on real-time traffic flows, weather conditions, and crowdsource information. As a result, FSP drivers can proactively respond to incidents, minimize traffic disruptions, and keep traffic flowing for improved transportation system reliability and safety.

A component that the FSP Program is not optimally equipped to assist with is the quick clearance of commercial truck vehicles. In 2022, the Department will be evaluating the merits of implementing a Towing and Recovery Incentive (TRIP) Pilot Program in Las Vegas to complement the FSP Program. The focus of the pilot will be standardizing heavy-duty towing company response and facilitating the safe and quick clearance of commercial vehicle crashes on the interstate system. Furthermore, if the TRIP Pilot Program is successful, the Department plans to fully implement and expand the program as necessary. The tables below reflect the 2020 facts and figures for the Las Vegas and Reno FSP Program.

Table 1: General Information

Freeway Service Patrol	Las Vegas	Reno
Number of Routes	13	3
Number of Centerline Miles	93	36

Interesting Fact #1: FSP routes, hours of operation, and coverage limits are monitored and adjusted regularly to optimize program efficiency and keep up with traffic flow demands. In July of 2020, FSP coverage was modified in Las Vegas from 87 to 93 centerline miles because there was a need for increased coverage along I-15 between Blue Diamond Road and St. Rose Parkway.

Table 2: Mitigation Data

Mitigations	Las Vegas	Reno
Abandoned Vehicle	4,208	1,340
Crash	3,285	1,056
Debris	2,146	834
Disabled Vehicle	20,990	4,599
Left on Arrival	2,789	1,804
Other	882	448
Scene Safety	8,418	3,167
Total Mitigations	42,718	13,248

Interesting Fact #2: Nearly 45,000 incidents are mitigated in Las Vegas and 15,000 incidents are mitigated in Reno each year. The most common type of incidents are disabled vehicles, which consist of flat tires, electrical issues, overheating and/or mechanical issues, and lost or sick motorists. The FSP technicians are specially trained to assist with a variety of freeway service-related issues ranging from minor mechanical problems to providing community first aid until first responders are able to arrive. The FSP fleet also consists of vehicles specially equipped to relocate crashed or disabled vehicles off the freeway and to the nearest secure location for the purpose of quickly and safely restoring traffic to free-flow conditions.

Table 3: Incident Clearance Times

Incident Clearance Time	Las Vegas	Reno
Less than 15 Minutes	79%	84%
15-30 Minutes	15%	11%
More than 30 Minutes	6%	5%

Interesting Fact #3: As a guideline, the FSP program aims to mitigate traffic incidents in less than 15 minutes to minimize traffic disruptions and improve safety for motorists and first responders. As indicated in Table 3 above, FSP technicians were able to clear approximately 80-85% of incidents within this timeframe. This is important because national statistics indicate that roadway incidents account for 25% of travel delays and that for every minute that a travel lane is blocked, the resulting congestion takes 4 minutes to dissipate and the probability of a secondary incident increases by 2.8%.

Nevada Population Statistics

LICENSED DRIVERS AND REGISTERED PASSENGER VEHICLES

Licensed Drivers	1995	1,072,376
	2021	2,211,149
Passenger Vehicles	1995	1,130,278
	2021	2,656,890

Nevada has experienced tremendous population growth for more than 30 years with little slow down until the last few years. The state's population has more than tripled since 1985 to more than 3.1 million residents. The majority of the growth has been in the major urban areas.

Roadway System Centerline Mileage

There are two federal-aid highway systems: The National Highway System (NHS) and the Non-National Highway System (Non-NHS). Most roads maintained by NDOT, and some maintained by other agencies, are federal-aid highways. Federal-aid highways carry the most traffic.

	Maintained by NDOT	Maintained by Local Agencies	Maintained Statewide
Federal Aid			
NHS	2,417	164	2,581
NON-NHS	2,427	2,598	5,025
Non-Federal Aid			
Non-Federal Aid	510	31,360	31,871
Total	5,354	34,122	39,477

NATIONAL HIGHWAY SYSTEM (NHS) (Federal-Aid)

The National Highway System (NHS) is a system of major federal-aid roads including all interstate routes, principal arterials, the defense strategic highway network, and strategic connectors. Interstate routes connect the principal metropolitan areas and industrial centers of America, serve the national defense, and connect suitable border points. The interstate routes, along with the other routes of the National Highway System, form the backbone of America’s highway network.

NON-NHS ROADS (Other Federal Aid)

This is a system of roads that is not part of the NHS system but is funded through federal-aid programs. The system is not considered to be strategic in terms of national defense but do play some role in connectivity and accessibility.

Non-Federal Aid

Improved and unimproved roads that are not part of the NHS or Non-NHS System, are functionally classified mainly as local or rural minor collectors. These roads provide access to the NHS and Non-NHS Systems. They are public facilities that are regularly maintained but may be paved or unpaved. On the NDOT-maintained system, these roads include access, frontage, and state park roads. The cities and counties maintain improved roads that generally adjoin homes, businesses, and farms. Roads in this category are not eligible for federal aid but do qualify for Nevada’s gas tax distributions.

ROAD DEFINITION

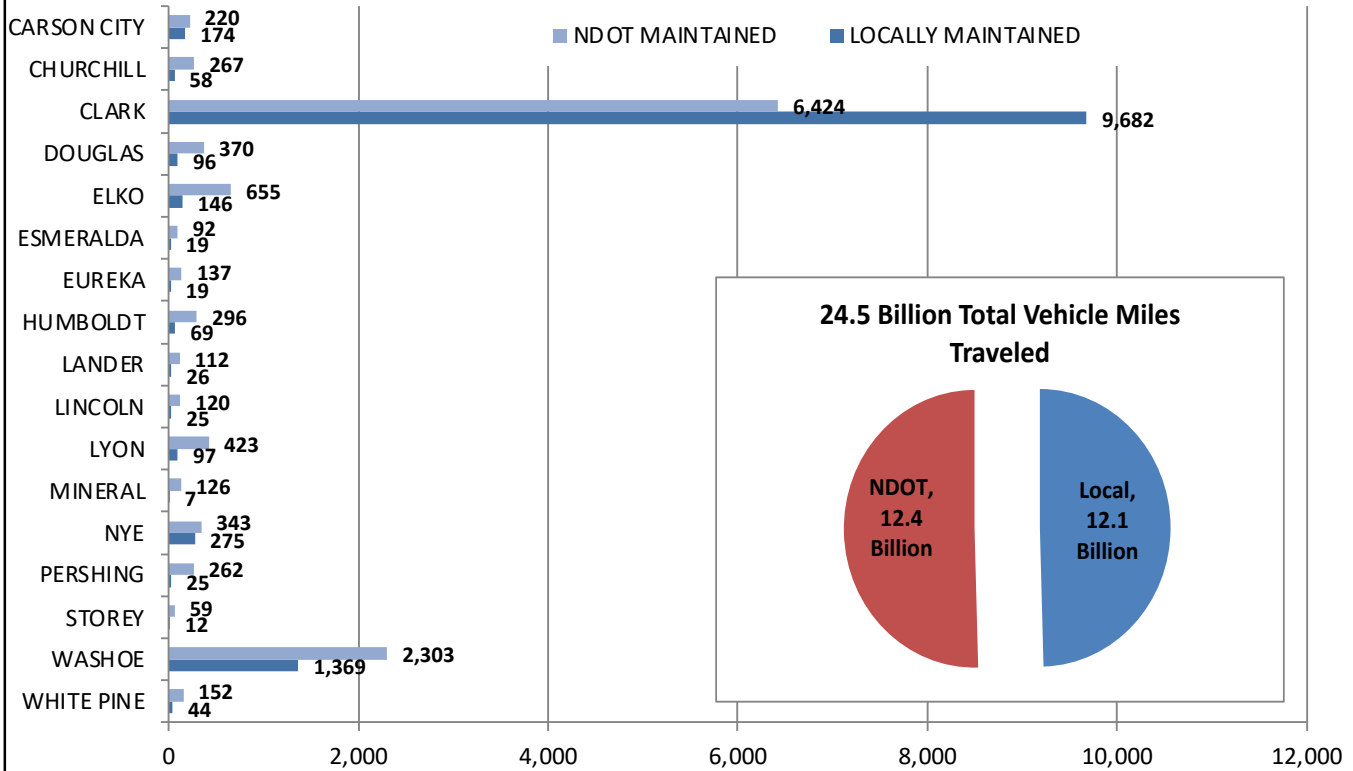

NDOT Maintained Pavement Condition

Centerline Miles by System – 2020 Condition (Present Serviceability Index)

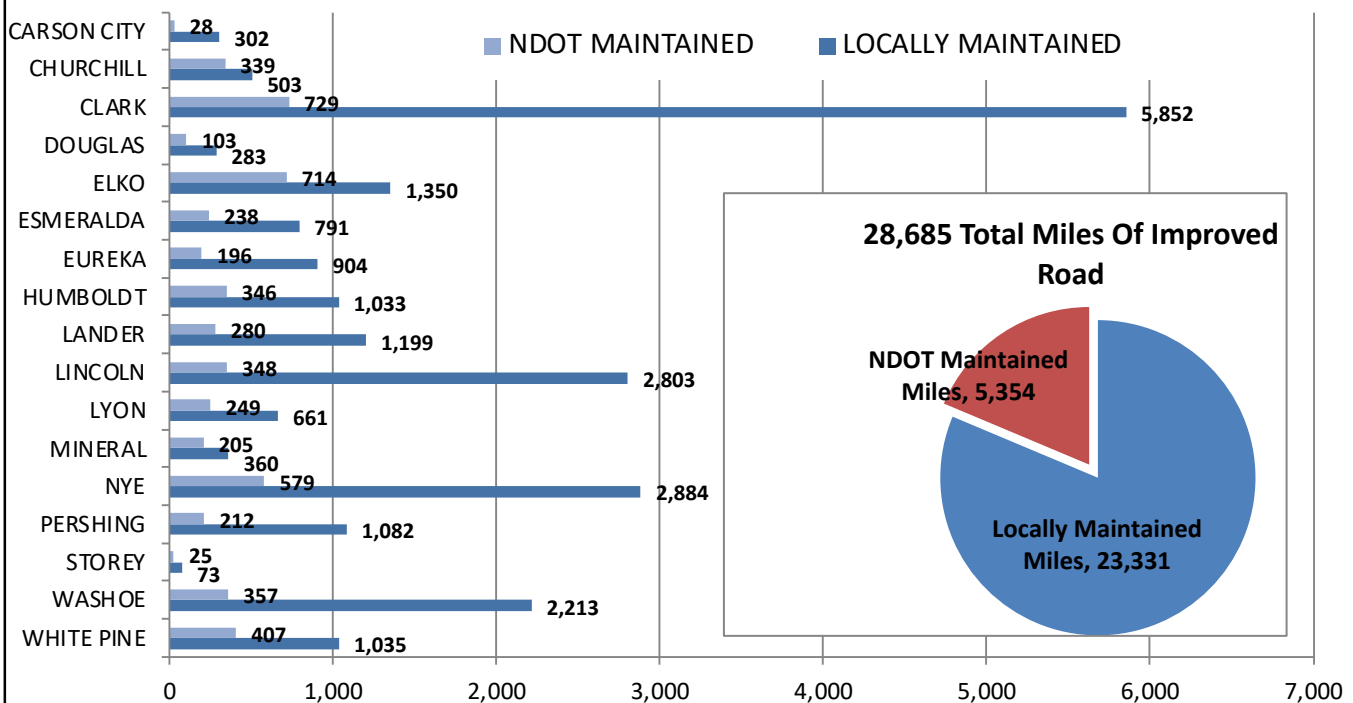

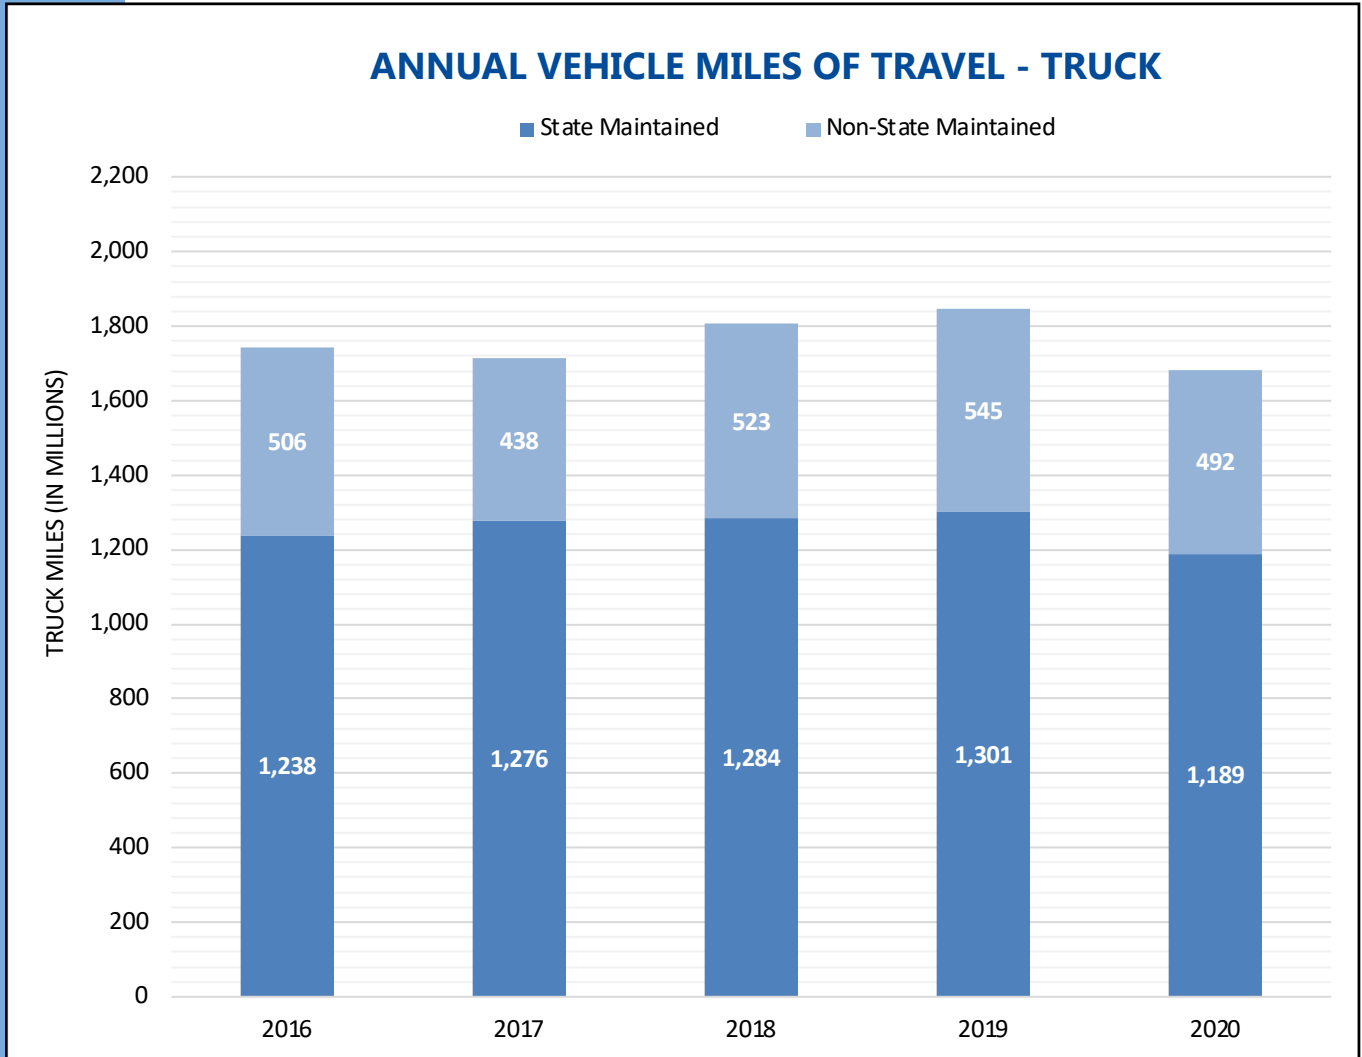

Note: System miles above may not match those on [page 34](#) because not all roads have had their condition rated.

2020 VEHICLE MILES TRAVELED (IN MILLIONS)

2020 MILES OF IMPROVED ROAD BY COUNTY

**Any tractor trailer with 3 or more axles and greater than 52,000 lbs. The state-maintained systems carry 70% of all truck traffic and 68% of the heavy truck traffic.*

NDOT Maintained Deficient Bridges Needing Renovation

Seismic 82

Structural 12

Currently, there are 2,127 bridges inspected by the Nevada Department of Transportation (NDOT) in the interest of public safety. Federally-owned bridges are inspected by the respective Federal agencies (i.e. USFS, BLM). NDOT maintains 1,238 bridges; 878 bridges are maintained by county, city, other local agencies, railroad, and other state agencies; and 11 bridges are privately maintained.

CAPITAL ASSETS AND DEBT ADMINISTRATION

The State’s capital assets for governmental and business-type activities as of June 30, 2020, amount to \$12.6 Billion, net of accumulated depreciation of \$1.5 Billion, resulting in a net book value of \$11.1 Billion. This investment in capital assets includes land, buildings, improvements other than buildings, equipment, software costs, infrastructure, rights-of-way, and construction in progress. Infrastructure assets are items that are normally immovable, such as roads and bridges.

As allowed by GASB Statement No. 34, the State has adopted an alternative process for recording depreciation expense on selected infrastructure assets. Under this alternative method, referred to as the modified approach, the State expenses certain maintenance and preservation costs and does not report depreciation expense on infrastructure. Utilization of this approach requires the State to: 1) commit to maintaining and preserving affected assets at or above a condition level established by the State; 2) maintain an inventory of the assets and perform periodic condition assessments to ensure that the condition level is being maintained; and 3) make annual estimates of the amounts that must be expended to maintain and preserve assets at the predetermined condition levels.

To monitor the condition of the roadways, the State uses the International Roughness Index (IRI). The State has set a policy that it will maintain a certain percentage of each category of its roadways with an IRI of 95 or less and will also maintain its bridges so that not more than 7% are structurally deficient. The following table shows the State’s policy and current condition level of the roadways and bridges:

Condition Level of the Roadways
Percentage of roadways with an IRI of 95 or less

	Category				
	I	II	III	IV	V
State Policy – minimum percentage	70%	65%	60%	40%	10%
Actual results of 2020 condition assessment	91%	86%	87%	54%	28%
Actual results of 2019 condition assessment	91%	86%	88%	57%	28%
Actual results of 2018 condition assessment	90%	88%	91%	58%	25%

Condition Level of the Bridges
Percentage of substandard bridges

	2021	2020	2018	2016
State Policy – maximum percentage	7%	7%	10%	10%
Actual results of condition assessment	1%	1%	1.5%	2%

Transportation Asset Condition

The most recent condition assessment shows a slight decline in the overall condition level of the roadways. However, the results of the three most recent condition assessments provide reasonable assurance that the condition level of the roadways is being preserved above the condition level established for all road categories.

The estimated amount necessary to maintain and preserve infrastructure assets at target condition levels exceeded the actual amounts of expense incurred for fiscal year 2020 by \$25.8 million. Even though actual spending for maintenance and reservation of infrastructure assets fell below estimates, condition levels are expected to approximately meet or exceed the target condition levels for the roadway category. Additional information on the State's infrastructure can be found in the Schedule of Infrastructure Condition and Maintenance Data and the Required Supplementary Information section to the financial statements and the Comprehensive Annual Financial Report.

General

State highways and bridges constructed and maintained by the Nevada Department of Transportation are funded primarily with highway-user revenue and federal funds. General Fund (general tax) revenue is not normally used. State and federal highway funds are principally derived from vehicle fuel tax and registration fees.

Federal Highway Trust Fund

Fuel tax and other highway-user revenue collected by the federal government are placed in the Federal Highway Trust Fund (HTF). Congress allocates these funds to the states per provisions in the Fixing Americas Surface Transportation Act (FAST) passed in 2015, and annual appropriation bills. The HTF is the main source of funding for most of the programs in the FAST Act. Federal funds are available only for reimbursements of expenditures on approved projects. Federal aid is not available for routine maintenance, administration, or other non-project related costs. To acquire federal funds, the state generally must pay (match) 5 to 20% of the project's cost, with the majority of Nevada's funding requiring only a 5% match due to the large amount of federal lands in the state.

State Constitutional Provisions

Article 9, Section 5 of the Nevada Constitution provides: "The proceeds from the imposition of any license or registration fee and other charges with respect to the operation of any motor vehicle upon any public highway in the state and the proceeds from the imposition of any excise tax on gasoline or other vehicle fuel shall, except costs of administration, be used exclusively for the construction, maintenance, and repair of the public highways of this state."

State Highway Fund

The State Highway Fund was established by NRS 408.235. It is a special revenue fund established to account for the receipt and expenditure of dedicated highway-user revenue. The majority of the Highway Fund finances the Department of Transportation. However, a significant amount of the operating costs of the Department of Motor Vehicles and the Department of Public Safety (primarily Highway Patrol) are also supported by appropriations from the Highway Fund. Typically, there are also minor appropriations or transfers to other agencies for their services, including the Department of Administration, the Attorney General, the Public Works Board, the Office of Project Management, and the Transportation Service Authority.

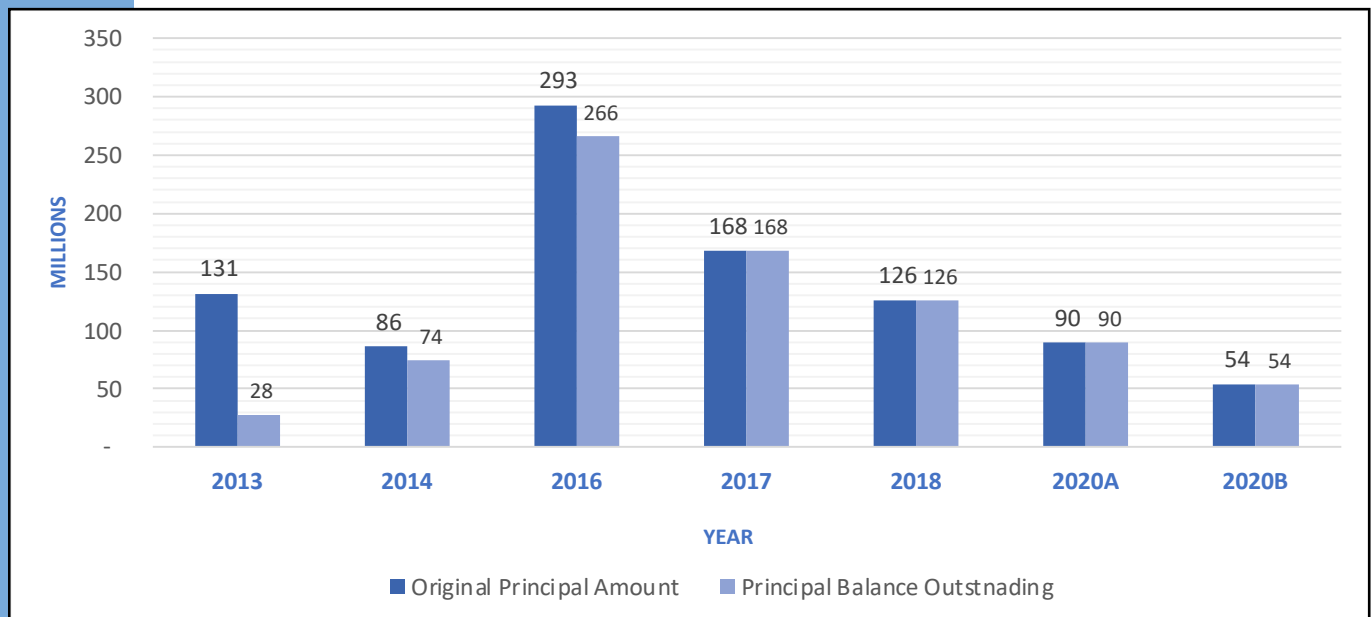

All over Nevada, NDOT employees are determined to build and maintain a top transportation system for the state.

Fuel Tax Inflation Indexing

Nevada Revised Statutes (NRS, i.e. Nevada law) prior to 2015 allow counties within certain population criteria to index fuel taxes to offset the effects of inflation (NRS) 373.066, 373.0663).

AB516 took effect October 1, 2003, requiring all motor fuels sold in Washoe County be subjected to fuel tax inflation indexing using CPI.

SB201 took effect January 1, 2010, allowing all motor fuels and special fuels delivered in Washoe County be subjected to fuel tax indexing (PPI) in addition to the previous CPI.

AB413 took effect January 1, 2014, allowing Clark County to start indexing all fuel types including special fuel but excluding jet and aviation fuels using PPI.

AB191 signed by the governor Brian Sandoval in 2015, required counties to include a question for voters in the November 8, 2016, ballot on fuel tax indexing. Only Clark County voters favored the tax. Washoe County already had fuel tax indexing authority.

Motor Fuel Indexed Taxes			
County	Gross Tax Rate	Net Tax Rate*	Authority
Clark County Index - PPI	14.8¢	14.5¢	AB413, NRS 373.0663
Washoe County Index - CPI	2.7¢	2.6¢	AB516, NRS 373.065
Washoe County Index - PPI	35.1¢	34.4¢	SB201, NRS 373.066

*Net Tax rates are calculated by taking the gross tax rate less 2% collection allowance. Charge customers gross rate, remit net rate to Department. Note that state tax is indexed in Clark County.

**Effective January 1, 2010, Cleanup and Inspection Fees are assessed on Ethanol and Methanol at the time of importation per SB332.

Vehicle Registration and Permit Fees

Registration fees established by Nevada Revised Statutes 482.480 and 482.482 are as follows.

\$33	Passenger Vehicles
\$39	Motorcycles (registration fee \$33 and \$6 for motorcycle safety)
\$33	Moped
\$27	Travel Trailer
\$10	Golf Cart
\$12	Trailer or Semitrailer (1,000 lbs. or less)
\$24	Trailer (more than 1,000 lbs.) Permit Fee
\$33	Low-speed vehicle

Motor truck, truck-tractor or bus

\$33 (flat rate)	Less than 6,000 lbs.
\$38 (flat rate)	6,000 to 8,499 lbs.
\$48 (flat rate)	8,500 to 10,000 lbs.
\$12	10,001 to 26,000 lbs. (per thousand pounds or fraction thereof)
\$17	26,001 to 80,000 lbs. (per thousand pounds or fraction thereof)

Governmental Services Tax, Driver's License, And Title Fees

GOVERNMENTAL SERVICES TAX

Legal Citation Chapter 371, Nevada Revised Statutes

Current Annual Rates

Basic rate: 4% of vehicle's depreciated assessed valuation. (Initial valuation of the vehicle is 35% of the manufacturer's suggested retail price, without accessories.)

Optional supplemental rate: 1% of vehicle's depreciated assessed valuation in Clark, Churchill counties.

Distribution

Basic Governmental Services Tax: For vehicles registered at a DMV office, 94% is distributed to local governments and 6% to the State Highway Fund as a collection commission. For vehicles registered at a County Assessor's office, 99% is distributed to local governments and the State Highway Fund receives 1%. Local governments use the funds primarily for schools and current debt service.

Supplemental Governmental Services Tax: An additional fee for vehicles in Clark, Churchill and White Pine counties. The funds are returned to those counties to be used for road construction or other governmental functions of the county. \$36 all out-of-state vehicles \$21 all in-state vehicles (new title).

Rural rides are offered by transit providers across the state every year, providing vital transportation and mobility services to reach healthcare, jobs and other opportunities

The public transit system in Nevada consists of both urban and rural areas. Metropolitan planning organizations (MPOs), provide transit service in large and small urban areas with populations of 50,000 or more. Local government authorities, Native American tribes, public and private non-profit organizations, and private operators of public transportation services, including intercity bus operators, provide transit service in rural areas with populations less than 50,000.

The Nevada DOT Transit Section provides operating, capital, and program administration funding assistance to rural public transit agencies and is responsible for state administration, sub-recipient oversight, and the approval of pass-through funding from the Federal

Transit Administration (FTA). The Nevada DOT conducts its activities with an approved State Management Plan (SMP) which outlines the responsibilities of both the State and all program sub-recipients.

The Transit Section ensures the availability of transit service and enhances the access of people in rural areas to health care, shopping, education, employment, public services, cultural activities, and recreation. The program consists of providing operating funds, capital funding for transit vehicles purchases, and subsidies to enhance the mobility of seniors and individuals with disabilities.

Annual Trips by Provider

Provider	Annual Trips (FFY2020 Data)
Churchill Regional Transportation	14,266
Douglas Area Rural Transit	13,375
Elko County	25,053
Humboldt County/Pleasant Senior Center	6,106
Lincoln County Human Services	1,707
Lyon County Human Services	6,336
Nye County Senior Nutrition Program	4,034
